"Automated Library System of Iloilo National High School". A Research for the Degree Bachelor of Science in Information Technology at Jonh B. Lacson Colleges Foundation-Molo, Inc. October 2006.

Abstract

The purpose of this study is to determine the effectiveness of an Automated Library System among the students and librarian personnel at Iloilo National High School for the school year 2005-2006. The data for this descriptive research was gathered through investigating the process of their borrowing and searching of the books inside the library. The participant of the study was the students and librarian personnel of Iloilo National High School (INHS). A panel of three jurors evaluated the research document. Areas assessed were the system program, script, editing and over-all impact.

Generally, the result showed that, Automated Library System, script, editing and over-all impact were rated "satisfactory".
