List of Cases

Preface

Chapter 1: Introduction to Business Research

What is business research? 1

Difference between qualitative and quantitative research 1

Can quantitative and qualitative business methods be combined? 2

Difference between basic business research and applied business research 2

Kinds of business research 3

- Conclusive (for quantitative business research) 3
- Exploratory (for qualitative business research) 3
- Business case analysis 4

Criteria for a good business research 5

Format of a business research 5

Other business research formats 8

Chapter 1 summary 9

Chapter 2: Research Structure and Content

Structure of business research....13
What is your problem?....13
Research model explained....15
Business research writing: Part 1....17
How to state and discuss the macro, micro, and problematic situation in the background of the study....17
How do you develop a conceptual framework that models the problem and subproblems in your study....18
How to link the conceptual framework with the theoretical framework....21
Why must the conceptual framework variables be anchored to a theory?....22
Some theories, statistical laws, and concepts (based on disciplines) as guide in writing the theoretical framework....22
How do you measure (solve) the problem and subproblem/s as represented by the conceptual framework....26
What is a hypothesis?....26
Which problem/s should be hypothesized?....27
How should a null hypothesis be stated....27
What should be assumed in the study?....27
What should be included in the significance of the study?....28
What should be included in the scope and limitation of the study?....29
What should be included in the definition of terms?....29
Chapter 2 summary....30

jntulibrary

Chapter 3: Literature Review and Citation

Business research writing: Part 2 33
Why are the variables used in the conceptual framework supported by literature review and synthesized? 33
How should the literature supporting the study be cited or paraphrased in the study 35
How the writer and the article publication date should be cited 37
Chapter 3 summary 38

Chapter 4: Research Methodology and Statistical Tools

Business research writing: Part 3 41
Research design 41
What is the right research design for the study? 41
Guidelines for using correlational research tools 42
Guidelines for using causal research tools 43
Sampling plan 44
How should the respondents be properly sampled 44
What is the appropriate sample size? 45
Which is preferred—random sampling or purposive sampling? 45
Types of random sampling 46
Simple random sampling 46
Stratified random sampling 48
Poisson distribution 48

intulibrary

Research instrument....49
What is the appropriate research instrument for gathering quantitative research data?....49
Survey questionnaire design....51
Sample cover letter....53
Sample close-ended question....54
Sample Likert scale question....54
Sample ranking question....55
Paired comparison question....56
Semantic differential question....56
Open-ended question....56
Recoding a negatively stated item....57
What ethical issues should be avoided in research?....57
How should the statistical treatment be reported
What should be tested statistically?....59
Sample statistical treatment....59
Next step: Gathering the data....60
Tips on how to gather the primary data through a survey questionnaire....60
ɔter 4 summary....61

jmlibrary

Chapter 5: Research Measurement, Applications, and Interpretations

easuring the problem....70
Need for statistical data analysis....71
Performing statistical data analysis....72
Diagnosing the problem....72
neral classifications of research questions ed on analysis....72

Types of data and measurement scales....73
Specifying the statistical test....75
Typical descriptive research measuring tools....77
Typical correlational and comparative research measuring tools....77
Descriptive research tools....78
Steps to generate the descriptive statistics using SPSS....78
Guidelines for using level of interpretation....85
Research measurement tools: Part 1....87
Guidelines on how to use the correlational measuring tools....87
Correlation research tools....87
Correlations....87
Steps in using Pearson correlation through SPSS....87
t-test....89
Steps in using paired sample *t*-test through SPSS....89
Steps in using independent samples *t*-test through SPSS....9
Analysis of variance (ANOVA)....9
Steps in using one-way ANOVA through SPSS....
ANOVA output....95
Test of scales reliability using Cronbach's alpha....96
Steps in scales reliability test through SPSS....97
Cronbach's alpha output....98
Chapter 5 summary....99

Chapter 6: Presentation of the Demographic Profile and the Descriptive Findings

Business research writing: Part 4....
Respondents' demographic profile....

Preferences 104
Ranking 105
Level of interpretation 105
Chapter 6 summary 106

Chapter 7: Multivariate Technique 1: Factor Analysis

Research measurement tools: Part 2 108
Factor analysis (FA) 108
Analysis and interpretation of EFA results 109
Application of factor analysis using principal component analysis 111
Steps in processing factor analysis 112
FA output and interpretation 117
Interpretation of factor analysis 121
Factor analysis validation 123
Comparison of the main FA with Split 1 and Split 2 127
Chapter 7 summary 127

Chapter 8: Multivariate Technique 2: Multiple Regression Analysis

Research measurement tools: Part 3 132
Multiple regression analysis (MRA) 132
Application of MRA using the stepwise method 136
Conceptual framework 136
Steps in processing MRA 137

MRA output 141
Interpretation of MRA 146
How to apply the moderating (dummy) variable 147
MRA validation 153
Chapter 8 summary 154

Chapter 9: Conclusions and Recommendations Formulation

Business research writing: Part 5 157
Formulating conclusions 157
Sample conclusions 158
Formulating recommendations 158
Sample recommendations 159
Chapter 9 summary 159

lmlibrary

Chapter 10: Manuscript Fine-Tuning and Formatting; Other Research Forms

How to design an encoding template using Excel 163
Steps in designing an encoding template using Excel 164
How to fine-tune your manuscript 169
PowerPoint presentation during proposal or final defense 171
Some business research forms 172
Sample abstract 176
Sample syllabus of business research 177
Chapter 10 summary 180

Glossary **182**
Bibliography **188**
Index **190**

List of Cases

1	How to start a research paper	11
2	Are we on the right track?	32
3	They have no way of knowing it	39
4.1	Does it matter?	64
4.2	The use of connections	66
4.3	What to ask	66
4.4	Unethical?	66
4.5	Uncooperative	67
5	What is the data telling me?	100
6	Demographic data presentation	107
7	How to interpret factor analysis	129
8	To reduce or not to reduce	155
9	Time to conclude and recommend	160
