" Cruise Ship Management Students' Attitude Towards Basic Safety Training Course". Undergraduate research paper. John B. Lacson Foundation Maritime University-(Molo), Inc., Iloilo City, May 2009.

Abstract

This descriptive research focused on the JBLEFMU Training Center students who took the Basic Training course, specifically those who graduate from Cruise Ship Management. Sources of data were thirty Cruise Ship Management students who finished their BST course and were classified as to their age and gender. Sampling method used was the accidental random sampling. Means and standard deviations were the descriptive statistics used.

Inferential statistics used was Spearman rho set at .05 alpha level. The study found out generally CSM students had a positive attitude towards BST course when taken as an
