"College of Business Students' Preference in Assignment References" Unpublished Research Paper John B. Lacson Foundation Maritime University-Molo, Inc. March, 2010.

Abstract

This study aimed to determine the number of College of Business students who prefer to use the library either printed articles or non-printed articles and number of students who prefer to use Internet either within school or outside school in making their assignments at JBLFMU - Molo. The respondents of the study were the 978 College of Business students of JBLFMU-Molo, Iloilo City during the academic year 2009-2010. Data were gathered through the survey-questionnaire devised by the researchers. Statistical tools employed were the frequency count, percentage and rank. Majority of students in College of Business prefer to use internet in making their school assignments. This is probably because of the information they can get out of this.
