## FEATURES

- 12** **The Digital World Faces Uncharted Waters, Too**  
Objective Analysis highlights issues facing the industry as a new year begins and gives a glimpse of familiar basics in a market forecast.
- 20** **For Data Centers, It's All About Cores**  
The one common theme about the data center from AMD, ARM, Intel, NVIDIA, and Xilinx is the more cores, the better.
- 26** **Your Next SoC Will Probably Include AI Acceleration**  
It may be possible to get an SoC without AI acceleration, but the trend is to provide mainstream machine-learning support.
- 28** **5G is Almost Here**  
5G will obviously make an impact in 2019, but how much of one depends on what you're doing.
- 30** **Don't Do It: Disabling SELinux**  
Implementing SELinux can definitely improve the security of a system—but only if you actually use it.
- 36** **Implementing Gas Sensors for Indoor Air-Quality Applications**  
Recent advances in the types of gas sensors available have created new opportunities for engineering smart products that can consider the air quality and smell.
- 40** **Living Without Halogens and Phthalates**  
More restrictive regulations like those from EU's REACH are pushing companies to produce products free from these substances. What are the implications?
- 45** **Twin DFT and Mission-Critical Safety Apps for Pre-Silicon Design Verification**  
Combining Apps with an emulation environment makes it possible to increase fault coverage, increase production yield, and reduce ATE test time and cost.

### EDITORIAL MISSION:

To provide the most current, accurate, and in-depth technical coverage of the key emerging technologies that engineers need to design tomorrow's products today.

**ELECTRONIC DESIGN** (ISSN 0013-4872) is published bi-monthly in Jan/Feb, Mar/Apr, May/June, July/Aug, Sept/Oct and Nov/Dec by Informa Media Inc., 9800 Metcalf Ave., Overland Park, KS 66212-2216. Paid rates for a one-year subscription are as follows: \$60 U.S., \$90 Canada, \$120 International. Periodicals postage paid at Kansas City, MO, and additional mailing offices. Editorial and advertising addresses: ELECTRONIC DESIGN, 605 Third Avenue, New York, NY 10158. Telephone (212) 204-4200. Printed in U.S.A. Title registered in U.S. Patent Office.
