Abstract

This quantitative study entitled experiences of working students of JBLFMU-Molo., year 2019-2020. Respondents of the study are Pre bac and ABM Strand. The total number of Respondents is 121 each section where randomly chosen;

Questionnaire is the research instrument used to gather data. The Researchers use descriptive statistic such as means and t test. One-way analysis of variance is the inferential statistic employed and arbitrary Tool use to interpret the mean result.

This study explores the experiences of working student while studying at JBLFMU-Molo.

The main objective is to know what is the meaning of working student while studying for SHS students at JBLFMU. 6 research questions were formulated:(1) Experiencing job while studying. (2) Maintaining grades while working. (3) Balancing time for studying and working. (4) Drinking Vitamins (5) Eating healthy foods for strength to work and study. (6) Give time for self to relax. Two Informants were purposively selected and interviewed to collect the data. The result shows that Working students understand the
