Food Processing

Principles, Technologies and Applications

Table of Contents

Preface	VII
Chapter 1 Food Processing: An Introduction	1
a. Food Processing	1
b. Basic Principles of Processing	4
c. Management of Food Quality and Safety	23
d. Food Control	29
e. Hygienic Design of Processing Facilities	35
f. Hygienic Design of Equipments	43
Chapter 2 Ambient Temperature Processing	48
a. Food Preparation	48
b. Extraction of Food Components	57
c. Size Reduction	85
d. Coating of Food	87
e. Mixing of Food	88
Chapter 3 Processing by Application of Heat	92
a. Heat Processing	92
b. Blanching	95
c. Sous Vide Cooking	100
d. Pasteurisation	101
e. Heat Sterilization	102
f. Evaporation	107
g. Distillation	120
h. Dehydration	124
i. Smoking	125
j. Extrusion Cooking	126
k. Frying	135
l. Dielectric	138
m. Ohmic	141
Chapter 4 Processing by Removal of Heat	146
a. Refrigeration	146
b. Cooling	156
c. Freezing	158
d. Freeze-Drying	168
Chapter 5 Post-Processing Operations	175
a. Materials Handling	175
b. Packaging	176

c. Filling and Sealing Packaged Foods	190
d. Storage	200
e. Food Industry Standards and Regulations	201

Permissions

Index

Index

A

Acidic Food, 11, 38
Artificial Sweetener, 4
Aseptic Processing, 15, 103

B

Batch Countercurrent, 67
Batch Operation, 65-66, 68
Blanching, 13-14, 16, 19, 50, 92, 95-100, 144

C

Canned Fruits, 3
Carbohydrates, 53-54, 74, 131
Cassava, 50, 58
Caustic Peeling, 56-57
Centrifugal Force, 7-8, 78, 111, 113
Cleaning Foods, 52
Cocoa Butter, 77
Colour Sorting, 56
Conveyor Bowl, 78-79
Crevices, 39, 45-46

D

Diffusion Process, 16, 62-63
Disc Bowl Centrifuge, 78
Distillation, 7-10, 64-65, 72-73, 75, 92, 119-124
Dry Roasting, 14

E

Edible Coatings, 87-88
Enzyme Hydrolysis, 12
Enzyme Secretion, 20
Extrusion, 20-21, 92, 126-128, 130-135, 188

F

Fermented Foods, 10, 20
Filter Cake, 80
Filtration, 9, 79-82, 91, 102, 105, 157
Flame Peeling, 56-57
Fluid Flow, 6-8, 21
Folic Acid, 5
Food Composition, 19, 159

Food Contaminants, 29, 33
Food Control, 29-34
Food Handling, 31, 34, 44
Food Preparation, 39, 48, 100
Food Quality, 11, 19, 23, 27-32, 47, 87-88, 166-167
Food Safety, 11, 23-24, 26-28, 30, 32, 35-36, 52, 55, 87, 92, 101, 144, 201-202, 204, 206, 209
Frame Filter Press, 79
Freeze Drying, 16, 117-118, 146

G

Gelatinization, 21, 128, 131-132
Good Manufacturing Practices, 24, 32
Grading, 55-56, 91

H

Heat Processing, 92, 116, 142
High-pressure Processing, 18

K

Knife Peeling, 56-57

L

Leaf Filter, 79-80
Lethal Agents, 10, 13, 17-18, 21
Light Processing, 100
Low-acid Foods, 10-11, 102

M

Microbiological Contamination, 33, 52
Microwave Heating, 15-16, 99, 142
Milk Processing, 9
Moisture Pockets, 41

N

Nutrition Fortification, 5
Nutritional Quality, 15, 48, 132, 148
Nutritional Value, 1, 3, 23, 132, 146, 166

O

Ohmic Heating, 15-16, 141-144
Oil Extraction, 74
Oil Roasting, 14

- P**
Packaging Material, 10, 18, 22, 179
Pasteurization, 1-2, 10, 13-14, 17-20, 22, 50, 92, 101, 140, 201
Pressure Gauges, 46
Primary Processing, 5-6, 9, 49
Processed Foods, 1, 3, 5-6, 11, 17-19, 22, 44, 49-50, 156, 175, 189, 200-201, 203-204, 208
Pulsed Electric Field Processing, 18-19
- R**
Raffinate, 59-61, 65-74
Raw Food Material, 5, 9-10, 21
Reverse Osmosis, 82-84, 174
- S**
Sauerkraut, 10
Sieving, 9, 55
Size Reduction, 9-10, 21, 48, 64, 85-87
Size Sorting, 55-56
- Sous Vide Cooking, 100
Spray Drying, 2, 16, 117-118
Steam Peeling, 56-57
Steam Processing, 14
Subcritical Water, 74, 76
Supercritical Fluid Extraction, 74
- T**
Thermal Diffusivity, 10
Thermal Processing, 6, 13, 18-19, 92-93, 95, 142, 144
Thermal Sterilization, 7, 14, 18-19
- U**
Ultrasound-assisted Extraction, 75
Unit Packages, 90
- V**
Value-added Ingredients, 4
Vapor Pressure, 7-8, 11, 16, 65, 81, 159-160, 169
