FLUID MECHANICS

3G eLEARNING

TABLE OF CONTENTS

1. Introduction to Fluid Dynamics

1.1 Magnetohydrodynamics 8
1.1.1 Ideal and Resistive MHD 8
1.1.2 Ideal MHD Equations 9
1.1.3 Applicability of Ideal MHD to Plasmas 10
1.1.4 Importance of Kinetic Effects 11
1.1.5 Extensions to Magnetohydrodynamics 12

1.2 Aerodynamics 18

1.3 Aeroelasticity 30
1.3.1 Steady Aeroelasticity 31
1.3.2 Dynamic Response 32

1.4 Computational Fluid Dynamics 34
1.4.1 Flow Measurement 45

1.5 Open Channel Flow Measurement 54

2. Geophysical Fluid Dynamics

2.1 Electrohydrodynamics 71

2.2 Rheology 73

2.3 Materials Science 78

2.4 Dimensionless Numbers 84

2.5 Boussinesq Approximation (Buoyancy) 86

2.6 Boussinesq Approximation (Water Waves) 88
2.6.1 Boussinesq Approximation 88
2.6.2 Original Boussinesq Equations 89

2.7 Euler Equations (Fluid Dynamics) 93
2.7.1 Conservation and Component Form 95
2.7.2 Conservation and Vector Form 96
2.7.3 Non-conservation Form with Flux Jacobians 96

3. Airy Wave Theory

3.1 Description 101
3.1.1 Wave characteristics 101
3.1.2 Mathematical Formulation of the Wave Motion 103
3.1.3 Wave Energy Density 108
3.1.4 Wave Action, Wave Energy Flux and Radiation Stress 109
3.1.5 Wave Mass Flux and Wave Momentum 110
3.1.6 Mass and Momentum Evolution Euations 111

3.2 Drag Equation 112

3.3 Navier–Stokes Equations 116
3.3.1 Nonlinearity 117
3.3.2 Turbulence 117
3.3.3 Derivation and Description 118
3.3.4 Convective Acceleration 119
3.3.5 Pressure-Free Velocity Formulation 129
3.3.6 Discrete Velocity 130
3.3.7 Compressible Flow of Newtonian Fluids 132
3.3.8 Exact Solutions of the Navier–Stokes Equations 134

3.4 Oseen Equations 134

3.5 Pascal's Law 135
3.6 Hagen–Poiseuille Equation 136
3.6.1 Standard Fluid Dynamics Notation 136
3.6.2 Relation to Darcy–Weisbach 137
3.6.3 Liquid Flow Through a Pipe 139
3.6.4 Poiseuille's Law 143
3.6.5 Electrical Circuits Analogy 144
3.6.6 Pressure 145
3.6.7 Types—Fluid Pressure 150

4. Static Pressure

4.1 Static Pressure in Fluid Dynamics 156
4.1.1 Static Pressure in Fluid Statics 158
4.2 Pressure Head 158
4.3 Reynolds Decomposition 162
4.4 Stokes Flow 163
4.5 Streamlines, Streaklines, and Pathlines 164
4.5.1 Mathematical Description 166
4.5.2 Types of Fluid Flow 169

5. Compressible Flow

5.1 Prandtl–Glauert Transformation 183
5.2 Karman-Tsien Correction Factor 184
5.2.1 Transonic Aerodynamics 185
5.3 Couette Flow 189
5.3.1 Couette Flow with Pressure Gradient 190
5.3.2 Taylor's Idealized Model 191
5.3.3 Finite-width Model 191
5.3.4 Wendl's Result for Physical Devices 192
5.4 Taylor–Couette Flow 192
5.4.1 Gollub-Swinney Circular Couette Experiment 195
5.5 Taylor Number 195
5.5.1 Free Molecular Flow 196
5.6 Incompressible Flow 197
5.6.1 Numerical Approximations of Incompressible Flow 201
5.6.2 Inviscid Flow 201
5.7 Laminar Flow 202
5.8 Open-Channel Flow 204
5.9 Secondary Flow 205
5.9.1 Examples of Secondary Flows 205
5.10 Stream Thrust Averaging 210
5.11 Superfluid 212
5.12 Transient Flow 218
5.12.1 Turbulence 218
5.13 Two-Phase Flow 222
5.13.1 Isothermal Flow 223

Bibliography
