FEATURES

- 24 Asphalt Roller's Hybrid Drive Goes Beyond Fuel Savings**
A collaboration between a machine builder and a hydraulic supplier led to a new design of asphalt rollers that reduces fuel consumption by 15% or more.
- 30 The Important Role of Condensate Drains**
Alas, the lowly condensate drain is usually often taken for granted or overlooked completely. However, these unsung heroes of a well-functioning compressed air system are key components for proper pneumatic system reliability and efficiency.
- 38 Hydraulic Pumps Dump the Diesel**
Advances in battery technology have made it practical to incorporate variable-speed electric pump drives in mobile hydraulic equipment, which reduces cost, complexity, and noise by supplementing or eliminating a machine's gas or diesel engine.
- 43 Protect Yourself from the Invisible Contaminant: Air**
Air is the unseen enemy of effective lubrication. Most equipment operators are already aware of the need to keep lubricants clean and free of dirt and water. But air contamination, if untreated, can be equally damaging to equipment.

Copyright © 2019 by Informa Media, Inc., all rights reserved. *Hydraulics & Pneumatics* is published monthly, except for a combined issue in Jan/Feb and Jul/Aug, by Informa Media, Inc., 9800 Metcalf Ave., Overland Park, KS 66212-2216. Phone: 216-696-7000. Periodicals postage paid at Kansas City, MO and at additional mailing offices. **POSTMASTER:** Send address changes to *Hydraulics & Pneumatics*, P.O. Box 2100, Skokie, IL 60076-7800. Copying: permission is granted to users registered with the Copyright Clearance Center Inc. (CCC) to photocopy any article provided base fee of \$1.25 per copy of the article plus 60¢ per page is paid directly to CCC, 222 Rosewood Dr., Danvers, MA 01932 (Code No. 0018-814X/00 \$1.25 + 60¢).

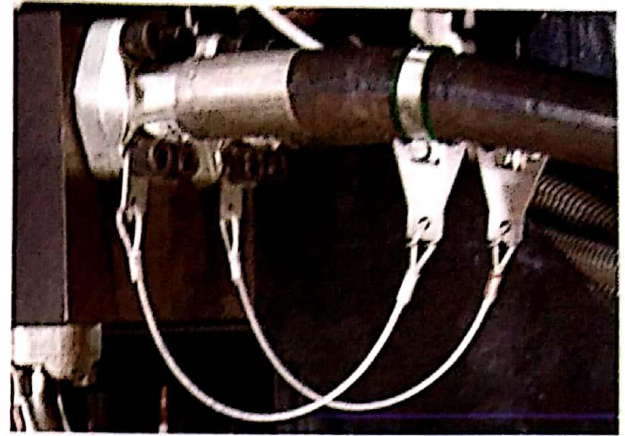

Subscriptions — U.S. and possessions outside U.S.: \$60/yr; \$90 two yrs. Single copies: \$10.00 each. In Canada: \$70.00/yr. \$110.00 two yrs. Canadian GST #R126431964. International: \$90.00/yr. \$140.00 two yrs. To order, phone 847-763-9670. Fax orders to 847-763-9673. Send subscription payment to: *Hydraulics & Pneumatics*, P.O. Box 2100, Skokie, IL 60076-7800. Out-of-print copies available in complete volumes as positive microfilm from NAPCO 800-420-6272 x 6578. Photocopies of articles \$5.00 each. Payment must accompany request. Volume 72, No. 6, July/August 2019.

S.A.E. FLANGED FLUID CONDUCTING SWIVEL JOINTS

Technical manual providing part numbers, operating units and dimensions for machine layout. One piece sub components with S.A.E. flanged connections provide reliable swivels for high horsepower fluid transmission.

Hose-Whip Restraint

THIS HOSE WHIP RESTRAINT SYSTEM prevents whipping of a pressurized hose if it becomes separated from an end fitting. The system is comprised of two parts: a hose collar and a cable assembly. The collar is selected based on the outside diameter of the hose, while the cable assembly is selected based on the type of hose connection. The hose collar and the cable assembly work together to keep the hose from whipping if the hose disconnects from the fitting. This protects both equipment and nearby personnel.

LEARN ALL ABOUT ELECTRO-HYDRAULIC CONTROL SYSTEMS

The fourth edition of the *Designers' Handbook for Electrohydraulic Servo and Proportional Systems* contains nearly 800 pages covering electrohydraulic systems and their design, including:

- how to calculate and control pressure losses in plumbing, subplates, and manifolds,
- how to analyze and control a variety of mechanical loads, including conveyors and belts and triangulated loads,
- valve dynamic properties and how to include them in your system,

- electronics, especially transducers and signal conditioning, and
 - mobile equipment electrical systems, including batteries and charging systems.
- For more information, including how to order a copy, visit <http://www.hydraulicspneumatics.com/bookstore>.
