PREFACE

This book has been conceptualized out of authors' love and passion for research. As a researcher, a research toolbox such as this will guide you as soon as you conduct your own research. The concepts in this material are explained in simplest form. Illustrative examples cut across disciplines or major fields of specialization to deepen your understanding and appreciation of the concepts. Throughout the text, there are lesson checks at the end of every chapter to gauge if the intended learning outcomes of this course are achieved.

It highlights the basic concepts of research, ethics in research, the research process and research variables, research problem, locating and reviewing literature, research methodology, writing a research proposal, and data analysis, presentation and interpretation.

The authors fervently hope that this learning material can assist you in your quest for continual improvement. May you also find this book informative, comprehensive, interesting and useful.
