Abstract

The purpose of this study was to determine the Level of Satisfaction on the Internet Usage Among Grade 12 Senior High School of JBLFMU –MOLO. The data were obtained by the use of a fifteen-item researchers made questionnaire. Descriptive statistic used was means and frequency counts. Inferential statistic used was t-test or independent samples and One-way Analysis of Variance. Result showed that participants are frequent users of Internet whether they are below 17, 18 and above, male or female, their GWA, residence and family income. A significant reference however was noted in the influence of the Internet when participants were grouped according to family income.
