BRIEF CONTENTS

PART ONE
Introduction to Operations Management 1

1. Introduction to Operations and Productivity 1
2. Understanding Operations Strategy in an International Environment 27
3. Project Management 55
4. Introduction to Forecasting 103

PART TWO
Designing Operations 155

5. Designing Goods and Services 155
6. Quality Management 191
   Supplement 6: Statistical Process Control 221
7. Process Strategy 253
   Supplement 7: Capacity Planning 287
8. Developing Location Strategies 315
9. Developing Layout Strategies 345
10. Job Design and Human Resources 387
    Supplement 10: Measuring Work 411

PART THREE
Managing Operations 431

11. Supply-Chain Management 431
    Supplement 11: Outsourcing as a Supply Chain Strategy 463
12. Managing Inventory 481
13. Aggregate Planning 525
14. Material Requirements Planning (MRP) and ERP 559
15. Scheduling in the Short-Term 599
16. Just-in-Time and Lean Productions 639
17. Dealing with Maintenance and Reliability 667

PART FOUR
Quantitative Modules 685

A. Decision-Making Tools 685
B. Linear Programming 705
C. Transportation Models 733
D. Waiting-Line Models 753
E. Learning Curves 781
F. Simulation 795

CD-ROM TUTORIALS

1. Statistical Tools for Managers T1-1
2. Acceptance Sampling T2-1
3. The Simplex Method of Linear Programming T3-1
4. The MODI and VAM Methods of Solving Transportation Problems T4-1
5. Vehicle Routing and Scheduling T5-1

CONTENTS

About the Authors vi
Foreword xx
Preface xxi

PART ONE
Introduction to Operations Management 1

1. Introduction to Operations and Productivity 1

Global Company Profile: Hard Rock Cafe 2
What Is Operations Management? 4
Organizing to Produce Goods and Services 4
Why Study OM? 4
What Operations Managers Do 7
How This Book Is Organized 7
The Heritage of Operations Management 8
Operations in the Service Sector 9
Differences between Goods and Services 10
Growth of Services 11
Service Pay 12
Exciting New Trends in Operations Management 12
The Productivity Challenge 14
Productivity Measurement 15
Productivity Variables 17
Productivity and the Service Sector 19
Ethics and Social Responsibility 20
Summary 20 • Key Terms 21 • Solved Problems 21 • Self-Test 22 • Internet and Student CD-ROM/DVD Exercises 22 • Discussion Questions 22 • Ethical Dilemma 23 • Problems 23 • Case Study: Zychol Chemicals Corporation 24 • Video Case Study: Hard Rock Cafe: Operations Management in Services 25 • Additional Case Study 25 • Bibliography 25 • Internet Resources 26

2. Understanding Operations Strategy in an International Environment 27

Global Company Profile: Boeing 28
A Global View of Operations 31
Cultural and Ethical Issues 33
Developing Missions and Strategies 34
Mission 34
Strategy 35
Achieving Competitive Advantage Through Operations 36
Competing on Differentiation 36
Competing on Cost 37
Competing on Response 37
Ten Strategic OM Decisions 39
Issues in Operations Strategy 42
Research 42
Preconditions 43
Dynamics 43
Strategy Development and Implementation 43
Critical Success Factors and Core Competencies 44
Build and Staff the Organization 46
Integrate OM with Other Activities 47
Global Operations Strategy Options 47
International Strategy 47
Multidomestic Strategy 47
Global Strategy 48
Transnational Strategy 49
Summary 49 • Key Terms 50 • Solved Problem 50 • Discussion Questions 50 • Self-Test 51 • Internet and Student CD-ROM/DVD Exercises 51 • Ethical Dilemma 51 • Problems 52 • Case Study: Minit-Lube 52 • Video Case Studies: Strategy at Regal Marine 53; Hard Rock Cafe's Global Strategy 53 • Additional Case Studies 54 • Bibliography 54 • Internet Resources 54

3. Project Management 55

Global Company Profile: Bechtel Group 56
The Importance of Project Management 58
Project Planning 59
The Project Manager 59
Work Breakdown Structure 60
Project Scheduling 61
Project Controlling 62
Project Management Techniques: PERT and CPM 63
The Framework of PERT and CPM 63
Network Diagrams and Approaches 63

Activity-on-Node Example 65
Activity-on-Arrow Example 68
Determining the Project Schedule 68
Forward Pass 69
Backward Pass 71
Calculating Slack Time and Identifying the Critical Path(s) 72
Variability in Activity Times 73
Three Time Estimates in PERT 74
Probability of Project Completion 76
Cost-Time Trade-Offs and Project Crashing 79
A Critique of PERT and CPM 81
Using Microsoft Project to Manage Projects 82
Creating a Project Schedule Using Microsoft Project 82
Tracking Progress and Managing Costs Using Microsoft Project 86
Summary 87 • Key Terms 87 • Using Software to Solve Project Management Problems 88 • Solved Problems 88 • Active Model Exercise 91 • Self-Test 92 • Internet and Student CD-ROM/DVD Exercises 93 • Discussion Questions 93 • Ethical Dilemma 93 • Problems 93 • Case Study: Southwestern University (A) 99 • Video Case Studies: Project Management at Arnold Palmer Hospital 100; Managing Hard Rock's Rockfest 101 • Additional Case Studies 102 • Bibliography 102 • Internet Resources 102

4. Introduction to Forecasting 103
Global Company Profile: Disney World 104
What Is Forecasting? 106
Forecasting Time Horizons 106
The Influence of Product Life Cycle 107
Types of Forecasts 107
The Strategic Importance of Forecasting 107
Human Resources 107
Capacity 107
Supply Chain Management 107
Seven Steps in the Forecasting System 108
Forecasting Approaches 108
Overview of Qualitative Methods 108
Overview of Quantitative Methods 109
Time-Series Forecasting 109
Decomposition of a Time Series 110
Naive Approach 110
Moving Averages 111
Exponential Smoothing 113
Measuring Forecast Error 115
Exponential Smoothing with Trend Adjustment 118
Trend Projections 121
Seasonal Variations in Data 123
Cyclical Variations in Data 128
Associative Forecasting Methods: Regression and Correlation Analysis 128
Using Regression Analysis for Forecasting 128
Standard Error of the Estimate 130
Correlation Coefficients for Regression Lines 131
Multiple-Regression Analysis 133
Monitoring and Controlling Forecasts 133
Adaptive Smoothing 135
Focus Forecasting 135
Forecasting in the Service Sector 136
Summary 137 • Key Terms 139 • Using Software in Forecasting 139 • Solved Problems 140 • Active Model Exercise 142 • Self-Test 143 • Internet and Student CD-ROM/DVD Exercises 143 • Discussion Questions 143 • Ethical Dilemma 144 • Problems 144 • Case Study: Southwestern University: (B) 151 • Video Case Study: Forecasting at Hard Rock Cafe 151 • Additional Case Studies 152 • Bibliography 152 • Internet Resources 153

PART TWO Designing Operations 155

5. Designing Goods and Services 155
Global Company Profile: Regal Marine 156
Goods and Services Selection 158
Product Strategy Options Support Competitive Advantage 158
Product Life Cycles 159
Life Cycle and Strategy 159
Product-by-Value Analysis 160
Generating New Products 160
New Product Opportunities 160
Importance of New Products 161
Product Development 162
Product Development System 162
Quality Function Deployment (QFD) 162
Organizing for Product Development 165
Manufacturability and Value Engineering 166
Issues for Product Design 167
Robust Design 167
Modular Design 167
Computer-Aided Design (CAD) 167
Computer-Aided Manufacturing (CAM) 168
Virtual Reality Technology 169
Value Analysis 169
Ethics and Environmentally Friendly Designs 169

Time-Based Competition 172
Purchasing Technology by Acquiring a Firm 174
Joint Ventures 174
Alliances 174
Defining a Product 174
Make-or-Buy Decisions 176
Group Technology 176
Documents for Production 176
Product Life-Cycle Management (PLM) 178
Service Design 178
Documents for Services 180
Application of Decision Trees to Product Design 182
Transition to Production 183
Summary 184 • Key Terms 184 • Solved Problem 184 • Self-Test 185 • Active Model Exercise 186 • Internet and Student CD-ROM/DVD Exercises 186 • Discussion Questions 187 • Ethical Dilemma 187 • Problems 187 • Case Study: De Mar's Product Strategy 189 • Video Case Study: Product Design at Regal Marine 189 • Additional Case Studies 190 • Bibliography 190 • Internet Resources 190

6. Quality Management 191

Global Company Profile: Arnold Palmer Hospital 192
Quality and Strategy 194
Defining Quality 194
Implications of Quality 195
Malcolm Baldrige National Quality Award 195
Cost of Quality (COQ) 196
Ethics and Quality Management 196
International Quality Standards 198
ISO 9000 198
ISO 14000 198
Total Quality Management 198
Continuous Improvement 198
Six Sigma 199
Employee Empowerment 200
Benchmarking 201
Just-in-Time (JIT) 202
Taguchi Concepts 203
Knowledge of TQM Tools 204
Tools of TQM 204
Check Sheets 204
Scatter Diagrams 205
Cause-and-Effect Diagrams 205
Pareto Charts 206
Flowcharts 207
Histograms 208
Statistical Process Control (SPC) 208
The Role of Inspection 208
When and Where to Inspect 208
Source Inspection 209
Service Industry Inspection 210
Inspection of Attributes versus Variables 210
TQM in Services 210
Summary 213 • Key Terms 213 • Active Model Exercise 213 • Self-Test 214 • Internet and Student CD-ROM/DVD Exercises 214 • Discussion Questions 214 • Ethical Dilemma 215 • Problems 215 • Case Study: Southwestern University (C) 217 • Video Case Studies: The Culture of Quality at Arnold Palmer Hospital 218; Quality at the Ritz-Carlton Hotel Company 218 • Additional Case Studies 219 • Bibliography 219 • Internet Resources 219

Supplement 6: Statistical Process Control 221

Statistical Process Control (SPC) 222
Control Charts for Variables 224
The Central Limit Theorem 224
Setting Mean Chart Limits ($\bar{x}$-Charts) 225
Setting Range Chart Limits (R-Charts) 228
Using Mean and Range Charts 229
Control Charts for Attributes 230
Managerial Issues and Control Charts 233
Process Capability 235
Process Capability Ratio (C_p) 235
Process Capability Index (C_{pk}) 236
Acceptance Sampling 237
Operating Characteristic Curve 238
Average Outgoing Quality 239
Summary 240 • Key Terms 240 • Using Software for SPC 240 • Solved Problems 241 • Active Model Exercise 242 • Self-Test 243 • Internet and Student CD-ROM/DVD Exercises 244 • Discussion Questions 244 • Problems 244 • Case Studies: Bayfield Mud Company 248; Alabama Airlines' On-Time Schedule 249 • Video Case Study: Farm to Fork: Quality at Darden Restaurants 250 • Additional Case Studies 251 • Bibliography 251 • Internet Resources 251

7. Process Strategy 253

Global Company Profile: Dell Computer Corp. 254
Four Process Strategies 256
Process Focus 256
Repetitive Focus 258
Product Focus 259
Mass Customization Focus 260
Comparison of Process Choices 263
Process Analysis and Design 266
Flow Diagrams 266
Time-Function Mapping 266
Value-Stream Mapping 267
Process Charts 268
Service Blueprinting 269

Service Process Design 270
Customer Interaction and Process Design 270
More Opportunities to Improve Service Processes 271
Selection of Equipment and Technology 271
Production Technology 272
Machine Technology 272
Automatic Identification System (AISs) and RFID 273
Process Control 273
Vision Systems 274
Robots 274
Automated Storage and Retrieval System (ASRSs) 274
Automated Guided Vehicles (AGVs) 275
Flexible Manufacturing Systems (FMSs) 275
Computer-Integrated Manufacturing (CIM) 275
Technology in Services 275
Process Redesign 277
Ethics and Environmentally Friendly Processes 279
Summary 279 • Key Terms 280 • Solved Problem 280 • Active Model Exercise 280 • Self-Test 281 • Internet and Student CD-ROM/DVD Exercises 281 • Discussion Questions 281 • Ethical Dilemma 282 • Problems 282 • Case Study: Rochester Manufacturing Corporation 283 • Video Case Studies: Process Analysis at Arnold Palmer Hospital 283; Process Strategy at Wheeled Coach 284 • Additional Case Studies 285 • Bibliography 285 • Internet Resources 285

Supplement 7: Capacity Planning 287

Capacity 288
Design and Effective Capacity 289
Capacity and Strategy 290
Capacity Considerations 290
Managing Demand 291
Demand and Capacity Management in the Service Sector 293
Capacity Planning 295
Break-Even Analysis 296
Single-Product Case 298
Multiproduct Case 298
Applying Decision Trees to Capacity Decisions 300
Applying Investment Analysis to Strategy-Driven Investments 301
Investment, Variable Cost, and Cash Flow 302
Net Present Value 302
Summary 305 • Key Terms 305 • Using Software for Break-Even Analysis 305 • Solved Problems 306 • Self-Test 308 • Internet and Student CD-ROM/DVD Exercises 308 • Discussion Questions 308 • Problems 309 • Video Case Study: Capacity Planning at Arnold Palmer Hospital 312 • Additional Case Studies 312 • Bibliography 313 • Internet Resources 313

8. Developing Location Strategies 315

Global Company Profile: FedEx 316
The Strategic Importance of Location 318
Factors That Affect Location Decisions 319
Labor Productivity 320
Exchange Rates and Currency Risk 320
Costs 321
Political Risk, Values, and Culture 322
Proximity to Markets 322
Proximity to Suppliers 322
Proximity to Competitors (Clustering) 322
Methods of Evaluating Location Alternatives 323
The Factor-Rating Method 323
Locational Break-Even Analysis 324
Center-of-Gravity Method 326
Transportation Model 328
Service Location Strategy 328
How Hotel Chains Select Sites 329
The Call Center Industry 330
Geographic Information Systems 331
Summary 332 • Key Terms 332 • Using Software to Solve Location Problems 333 • Solved Problems 333 • Self-Test 335 • Active Model Exercise 335 • Internet and Student CD-ROM/ DVD Exercises 336 • Discussion Questions 336 • Ethical Dilemma 336 • Problems 337 • Video Case Studies: Locating the Next Red Lobster Restaurant 341 · Where to Place the Hard Rock Cafe 342 • Additional Case Studies 343 • Bibliography 343 • Internet Resources 343

9. Developing Layout Strategies 345

Global Company Profile: McDonald's 346
The Strategic Importance of Layout Decisions 348
Types of Layout 348
Office Layout 350
Retail Layout 351
Servicescapes 352
Warehou ing and Storage Layouts 353
Cross-Docking 354
Random Stocking 354
Customizing 354
Fixed-Position Layout 355
Process-Oriented Layout 356
Computer Software for Process-Oriented Layouts 360
Work Cells 360
Requirements of Work Cells 361
Staffing and Balancing Work Cells 361
The Focused Work Center and the Focused Factory 364

Repetitive and Product-Oriented Layout 364
Assembly-Line Balancing 366
Summary 370 • Key Terms 371 • Using Software to Solve Layout Problems 371 • Solved Problems 372 • Self-Test 375 • Active Model Exercise 375 • Internet and Student CD-ROM/DVD Exercises 376 • Discussion Questions 376 • Ethical Dilemma 377 • Problems 377 • Case Study: State Automobile License Renewals 382 • Video Case Studies: Laying Out Arnold Palmer Hospital's New Facility 383; Facility Layout at Wheeled Coach 384 • Additional Case Studies 384 • Bibliography 385 • Internet Resources 385

10. Job Design and Human Resources 387

Global Company Profile: Rusty Wallace's NASCAR Racing Team 388
Human Resource Strategy for Competitive Advantage 390
Constraints on Human Resource Strategy 390
Labor Planning 391
Employment-Stability Policies 391
Work Schedules 391
Job Classifications and Work Rules 392
Job Design 392
Labor Specialization 392
Job Expansion 393
Psychological Components of Job Design 394
Self-Directed Teams 394
Motivation and Incentive Systems 395
Ergonomics and the Work Environment 397
Methods Analysis 399
The Visual Workplace 402
Ethics and the Work Environment 403
Labor Standards 403
Summary 404 • Key Terms 404 • Solved Problem 404 • Self-Test 405 • Internet and Student CD-ROM/DVD Exercises 405 • Discussion Questions 405 • Ethical Dilemma 406 • Problems 406 • Case Study: The Fleet That Wanders 407 • Video Case Study: Hard Rock's Human Resource Strategy 407 • Additional Case Studies 408 • Bibliography 408 • Internet Resources 409

Supplement 10: Measuring Work 411

Labor Standards and Work Measurement 412
Historical Experience 413
Time Studies 413
Predetermined Time Standards 418
Work Sampling 420
Summary 423 • Key Terms 423 • Solved Problems 423 • Active Model Exercise 425 • Self-Test 425 • Internet and Student CD-ROM/DVD Exercises 426 • Discussion Questions 426 • Problems 426 • Case Study: Jackson Manufacturing Company 429 • Additional Case Studies 430 • Bibliography 430 • Internet Resources 430

PART THREE
Managing Operations 431

11. Supply-Chain Management 431

Global Company Profile: Darden Restaurants 432
The Supply Chain's Strategic Importance 434
Global Supply Chain Issues 435
Supply Chain Economics 436
Make-or-Buy Decisions 437
Outsourcing 438
Ethics in the Supply Chain 438
Supply Chain Strategies 438
Many Suppliers 439
Few Suppliers 439
Vertical Integration 439
Keiretsu *Networks 440*
Virtual Companies 440
Managing the Supply Chain 441
Issues in an Integrated Supply Chain 441
Opportunities in an Integrated Supply Chain 442
E-Procurement 445
Online Catalogs 445
Auctions 446
RFQs 446
Real-Time Inventory Tracking 446
Vendor Selection 447
Vendor Evaluation 447
Vendor Development 448
Negotiations 448
Logistics Management 448
Distribution Systems 449
Third-Party Logistics 450
Cost of Shipping Alternatives 451
Logistics, Security, and JIT 452
Measuring Supply Chain Performance 452
Summary 455 • Key Terms 455 • Solved Problem 455 • Self-Test 456 • Internet and Student CD-ROM/DVD Exercises 456 • Discussion Questions 456 • Ethical Dilemma 457 • Problems 457 • Case Study: Dell's Value Chain 458 • Video Case Studies: Darden's Global Supply Chains; Arnold Palmer Hospital's Supply Chain; Supply Chain Management at Regal Marine 459 • Additional Case Studies 461 • Bibliography 461 • Internet Resources 461

Supplement 11: Outsourcing as a Supply Chain Strategy 463

What Is Outsourcing? 464
Types of Outsourcing 465
Strategic Planning and Core Competencies 466
The Theory of Comparative Advantage 467
Outsourcing Trends and Political Repercussions 467
Risks in Outsourcing 468
Methodologies for Outsourcing 470
Evaluating Multiple Criteria with Factor Rating 470
Break-even Analysis 472
Advantages and Disadvantages of Outsourcing 473
Advantages of Outsourcing 473
Disadvantages of Outsourcing 474
Audits and Metrics to Evaluate Outsourcing Performance 475
Ethical Issues in Outsourcing 475
Summary 476 • Key Terms 476 • Using Software to Solve Outsourcing Problems 476 • Solved Problem 476 • Self-Test 477 • Internet and Student CD-ROM/DVD Exercises 477 • Discussion Questions 477 • Problems 478 • Case Study: Outsourcing to Tata 479 • Video Case Study: Outsourcing Offshore at Darden 479 • Bibliography 480 • Internet Resources 480

12. Managing Inventory 481

Global Company Profile: Amazon.com 482
Functions of Inventory 484
Types of Inventory 484
Inventory Management 485
ABC Analysis 485
Record Accuracy 486
Cycle Counting 487
Control of Service Inventories 488
Inventory Models 489
Independent vs. Dependent Demand 489
Holding, Ordering, and Setup Costs 490
Inventory Models for Independent Demand 490
The Basic Economic Order Quantity (EOQ) Model 490
Minimizing Costs 491
Reorder Points 495
Production Order Quantity Model 497
Quantity Discount Models 500
Probabilistic Models and Safety Stock 502
Other Probabilistic Models 505
Fixed-Period (P) Systems 507
Summary 509 • Key Terms 510 • Using Software to Solve Inventory Problems 510 • Solved Problems 511 • Self-Test 515 • Active Model Exercise 515 • Internet and Student CD-ROM/DVD Exercises 516 • Discussion Questions 516 • Ethical Dilemma 516 • Problems 517 • Case Studies: Zhou Bicycle Company; Sturdivant Sound Systems 521 • Video Case Study: Inventory Control at Wheeled Coach 522 • Additional Case Studies 522 • Bibliography 523 • Internet Resources 523

13. Aggregate Planning 525

Global Company Profile: Anheuser-Busch 526
The Planning Process 528
The Nature of Aggregate Planning 528
Aggregate Planning Strategies 530
Capacity Options 531
Demand Options 532
Mixing Options to Develop a Plan 532
Methods for Aggregate Planning 533
Graphical Methods 534
Mathematical Approaches 538
Comparison of Aggregate Planning Methods 540
Aggregate Planning in Services 541
Restaurants 542
Hospitals 542
National Chains of Small Service Firms 542
Miscellaneous Services 542
Airline Industry 543
Yield Management 543
Summary 546 • Key Terms 547 • Using Software for Aggregate Planning 547 • Solved Problems 548 • Self-Test 550 • Active Model Exercise 550 • Internet and Student CD-ROM/DVD Exercises 551 • Discussion Questions 551 • Ethical Dilemma 552 • Problems 552 • Case Studies: Southwestern University: (G); Andrew-Carter, Inc. 556 • Additional Case Studies 558 • Bibliography 558 • Internet Resources 558

14. Material Requirements Planning (MRP) and ERP 559

Global Company Profile: Wheeled Coach 560
Dependent Demand 562
Dependent Inventory Model Requirements 562
Master Production Schedule 562
Bills of Material 565
Accurate Inventory Records 567
Purchase Orders Outstanding 567
Lead Times for Components 567
MRP Structure 568
MRP Management 572
MRP Dynamics 572
MRP and JIT 572
Lot-Sizing Techniques 574

Extensions of MRP 578
Material Requirements Planning II (MRP II) 578
Closed-Loop MRP 579
Capacity Planning 579
MRP in Services 580
Distribution Resource Planning (DRP) 581
Enterprise Resource Planning (ERP) 582
Advantages and Disadvantages of ERP Systems 585
ERP in the Service Sector 585
Summary 586 • Key Terms 586 • Using Software to Solve MRP Problems 586 • Solved Problems 587 • Self-Test 590 • Active Model Exercise 590 • Internet and Student CD-ROM/DVD Exercises 591 • Discussion Questions 591 • Ethical Dilemma 592 • Problems 592 • Case Study: Ikon's Attempt at ERP 595 • Video Case Study: MRP at Wheeled Coach 596 • Additional Case Studies 597 • Bibliography 597 • Internet Resources 597

15. Scheduling in the Short-Term 599

Global Company Profile: Delta Air Lines 600
The Strategic Importance of Short-Term Scheduling 602
Scheduling Issues 602
Forward and Backward Scheduling 603
Scheduling Criteria 605
Scheduling Process-Focused Facilities 605
Loading Jobs 606
Input-Output Control 606
Gantt Charts 607
Assignment Method 609
Sequencing Jobs 612
Priority Rules for Dispatching Jobs 612
Critical Ratio 615
Sequencing N Jobs on Two Machines: Johnson's Rule 616
Limitations of Rule-Based Dispatching Systems 618
Finite Capacity Scheduling (FCS) 618
Theory of Constraints 619
Bottlenecks 620
Drum, Buffer, Rope 620
Scheduling Repetitive Facilities 621
Scheduling Services 621
Scheduling Service Employees with Cyclical Scheduling 623
Summary 625 • Key Terms 625 • Using Software for Short-Term Scheduling 625 • Solved Problems 627 • Active Model Exercise 630 • Self-Test 631 • Internet and Student CD-ROM/DVD Exercises 631 • Discussion Questions 631 • Ethical Dilemma 632 • Problems 632 • Case Study: Old Oregon Wood Store 635 • Video Case Study: Scheduling at Hard Rock Cafe 636 • Additional Case Studies 637 • Bibliography 637 • Internet Resources 637

16. Just-in-Time and Lean Productions 639

Global Company Profile: Toyota Motor Corporation 640
Just-in-Time, the Toyota Production System, and Lean Operations 642
Eliminate Waste 642
Remove Variability 643
Improve Throughout 644
Just-in-Time (JIT) 644
JIT Partnerships 645
Concerns of Suppliers 646
JIT Layout 647
Distance Reduction 647
Increased Flexibility 647
Impact on Employees 647
Reduced Space and Inventory 647
JIT Inventory 648
Reduce Variability 648
Reduce Inventory 649
Reduce Lot Sizes 649
Reduce Setup Costs'650
JIT Scheduling 651
Level Schedules 652
Kanban 652
JIT Quality 655
Toyota Production System 656
Continuous Improvement 656
Respect for People 656
Standard Work Practice 656
Lean Operations 657
Building a Lean Organization 657
Lean Operations in Services 658
Summary 659 • Key Terms 659 • Solved Problem 659 • Self-Test 660 • Internet and Student CD-ROM/DVD Exercises 660 • Discussion Questions 660 • Ethical Dilemma 661 • Problems 661 • Case Studies: Mutual Insurance Company of Iowa; JIT After the Fire 662 • Video Case Study: JIT at Arnold Palmer Hospital 664 • Additional Case Studies 664 • Bibliography 665 • Internet Resources 665

17. Dealing with Maintenance and Reliability 667

Global Company Profile: Orlando Utilities Commission 668
The Strategic Importance of Maintenance and Reliability 670
Reliability 671
Improving Individual Components 671
Providing Redundancy 673
Maintenance 674
Implementing Preventive Maintenance 674
Increasing Repair Capabilities 678

Total Productive Maintenance 679
Techniques for Enhancing Maintenance 679
Summary 679 • Key Terms 680 • Using Software to Solve Reliability Problems 680 • Solved Problems 680 • Internet and Student CD-ROM/DVD Exercises 680 • Self-Test 681 • Discussion Questions 681 • Ethical Dilemma 681 • Problems 682 • Case Study: Worldwide Chemical Company 683 • Additional Case Studies 684 • Bibliography 684 • Internet Resources 684

PART FOUR
Quantitative Modules 685

A. Decision-Making Tools 685

The Decision Process in Operations 686
Fundamentals of Decision Making 687
Decision Tables 688
Types of Decision-Making Environments 688
Decision Making Under Uncertainty 688
Decision Making Under Risk 689
Decision Making Under Certainty 690
Expected Value of Perfect Information (EVPI) 691
Decision Trees 691
A More Complex Decision Tree 693
Using Decision Trees in Ethical Decision Making 695
Summary 696 • Key Terms 696 • Using Software for Decision Models 696 • Self-Test 697 • Solved Problems 698 • Internet and Student CD-ROM/DVD Exercises 699 • Discussion Questions 699 • Problems 699 • Case Studies: Tom Tucker's Liver Transplant; Ski Right Corp. 703 • Additional Case Study 704 • Bibliography 704

B. Linear Programming 705

Requirements of a Linear Programming Problem 706
Formulating Linear Programming Problems 707
Shader Electronics Example 707
Graphical Solution to a Linear Programming Problem 708
Graphical Representation of Constraints 708
Iso-Profit Line Solution Method 709
Corner-Point Solution Method 711
Sensitivity Analysis 712
Sensitivity Report 713
Changes in the Resources or Right-Hand-Side Values 713
Changes in the Objective Function Coefficient 714
Solving Minimization Problems 715
Linear Programming Applications 716
Production-Mix Example 717
Diet Problem Example 718
Labor Scheduling Example 719
The Simplex Method of LP 720
Summary 721 • Key Terms 721 • Using Software to Solve LP Problems 721 • Solved Problems 722 • Active Model Exercise 724 • Self-Test 725 • Internet and Student CD-ROM/DVD Exercises 726 • Discussion Questions 726 • Problems 726 • Case Study: Golding Landscaping and Plants, Inc. 731 • Additional Case Study 732 • Bibliography 732

C. Transportation Models 733

Transportation Modeling 734
Developing an Initial Solution 736
The Northwest-Corner Rule 736
The Intuitive Lowest-Cost Method 737
The Stepping-Stone Method 738
Special Issues in Modeling 741
Demand Not Equal to Supply 741
Degeneracy 742
Summary 743 • Key Terms 743 • Using Software to Solve Transportation Problems 743 • Solved Problems 745 • Self-Test 747 • Internet and Student CD-ROM/DVD Exercises 747 • Discussion Questions 747 • Problems 748 • Case Study: Custom Vans, Inc. 751 • Additional Case Study 752 • Bibliography 752

D. Waiting-Line Models 753

Characteristics of a Waiting-Line System 754
Arrival Characteristics 755
Waiting-Line Characteristics 756
Service Characteristics 756
Measuring a Queue's Performance 758
Queuing Costs 758
The Variety of Queuing Models 759
Model A (M/M/1): Single-Channel Queuing Model with Poisson Arrivals and Exponential Service Times 760
Model B (M/M/S): Multiple-Channel Queuing Model 763
Model C (M/D/1): Constant-Service-Time Model 766
Model D: Limited-Population Model 767
Other Queuing Approaches 770
Summary 771 • Key Terms 771 • Using Software to Solve Queuing Problems 771 • Solved Problems 772 • Self-Test 774 • Active Model Exercise 774 • Internet and Student CD-ROM/DVD Exercises 775 • Discussion Questions 775 • Problems 776 • Case Studies: New England Foundry; The Winter Park Hotel 779 • Additional Case Study 780 • Bibliography 780

E. Learning Curves 781

Learning Curves in Services and Manufacturing 783
Applying the Learning Curve 784
Arithmetic Approach 784
Logarithmic Approach 784
Learning-Curve Coefficient Approach 785
Strategic Implications of Learning Curves 787
Limitations of Learning Curves 788
Summary 788 • Key Term 788 • Using Software for Learning Curves 788 • Solved Problems 789 • Active Model Exercise 790 • Self-Test 790 • Internet and Student CD-ROM/DVD Exercises 791 • Discussion Questions 791 • Problems 791 • Case Study: SMT's Negotiation with IBM 793 • Bibliography 794

F. Simulation 795

What Is Simulation? 796
Advantages and Disadvantages of Simulation 797
Monte Carlo Simulation 797
Simulation of a Queuing Problem 801
Simulation and Inventory Analysis 803
Summary 806 • Key Terms 806 • Using Software in Simulation 806 • Solved Problems 808 • Self-Test 809 • Internet and Student CD-ROM/DVD Exercises 809 • Discussion Questions 810 • Problems 810 • Case Study: Alabama Airlines' Call Center 814 • Additional Case Studies 815 • Bibliography 815

Appendices A1

Indices I1

Photo Credits C1

CD-ROM Tutorials

1. Statistical Tools for Managers T1-1

Discrete Probability Distributions T1-2
Expected Value of a Discrete Probability Distribution T1-3
Variance of a Discrete Probability Distribution T1-3
Continuous Probability Distributions T1-4
The Normal Distribution T1-4
Summary T1-7 • Key Terms T1-7 • Discussion Questions T1-7 • Problems T1-7 • Bibliography T1-8

2. Acceptance Sampling T2-1

Sampling Plans T2-2
Single Sampling T2-2
Double Sampling T2-2
Sequential Sampling T2-2
Operating Characteristic (OC) Curves T2-2
Producer's and Consumer's Risk T2-3
Average Outgoing Quality T2-5
Summary T2-6 • Key Terms T2-6 • Solved Problem T2-7 • Discussion Questions T2-7 • Problems T2-7

3. The Simplex Method of Linear Programming T3-1

Converting the Constraints to Equations T3-2
Setting Up the First Simplex Tableau T3-2
Simplex Solution Procedures T3-4
Summary of Simplex Steps for Maximization Problems T3-6
Artificial and Surplus Variables T3-7
Solving Minimization Problems T3-7
Summary T3-8 • Key Terms T3-8 • Solved Problem T3-8 • Discussion Questions T3-8 • Problems T3-9

4. The MODI and VAM Methods of Solving Transportation Problems T4-1

MODI Method T4-2
How to Use the MODI Method T4-2
Solving the Arizona Plumbing Problem with MODI T4-2
Vogel's Approximation Method: Another Way to Find an Initial Solution T4-4
Discussion Questions T4-8 • Problems T4-8

5. Vehicle Routing and Scheduling T5-1

Introduction T5-2
Service Delivery Example: Meals-for-ME T5-2
Objectives of Routing and Scheduling Problems T5-2
Characteristics of Routing and Scheduling Problems T5-3
Classifying Routing and Scheduling Problems T5-3
Solving Routing and Scheduling Problems T5-4
Routing Service Vehicles T5-5
The Traveling Salesman Problem T5-5
Multiple Traveling Salesman Problem T5-8
The Vehicle Routing Problem T5-9
Cluster First, Route Second Approach T5-10
Scheduling Service Vehicles T5-11
The Concurrent Scheduler Approach T5-13
Other Routing and Scheduling Problems T5-13
Summary T5-14 • Key Terms T5-15 • Discussion Questions T5-15 • Problems T5-15 • Case Study: Routing and Scheduling of Phlebotomists T5-17 • Bibliography T5-17

GENERAL INDEX

ABC analysis, 485–486
Acceptable quality level (AQL), 238
Acceptance sampling, 237–239, T2–1 to T2–7
  average outgoing quality and (AOQ), T2–5 to T2–6
  average outgoing quality limit (AOQL), T2–7
  sampling plans, T2–2
Accurate inventory records, MRP and, 567
Active model exercises:
  aggregate planning, 550–551
  design of goods & services, decision tree, 186
  forecasting, exponential smoothing &, 142
  inventory mgt., 515–516
  layout strategy, 375–376
  learning curves, 790
  location strategies, 335–336
  managing quality, pareto chart &, 213
  material requirements planning & ERP, 570, 590–591
  process strategy, crossover chart &, 280
  project mgt., network &, 91–92
  short-term scheduling, 630
  statistical process control, p-charts &, 242–243
  waiting-line models, 774–775
  work measurement, 425
Activity charts, job design and, 400–401
Activity map, 46
Activity-on-Arrow (AOA), 63, 68
Activity-on-Node (AON), 63–67
Adaptive smoothing, 135
Adjustable cells, sensitivity report, 713
Advanced shipping notice (ASN), 445
Aggregate planning, 525–558
  comparison of methods for, 540–541
  defined, 528
  methods for, 533–541
  nature of, 528–530
  planning process and, 528
  services and, 541–543
  strategies for, 530–533
  yield management and, 543–546
Aggregate scheduling. *See* Aggregate planning
Airfreight, logistics management and, 449
Airline industry:
  aggregate planning and, 543
  scheduling services in, 600–602, 622
ALDEP, 360
Algebraic approach, break-even analysis and, 297–298
Alliances, time-based competition and, 174
Alternative:
  in decision making, 687
  in linear programming, 707
Amazon.com, 482–484
Ambient conditions, 352–353
American Airlines, 543
American National Can Co., 266–267
American Society for Quality (ASQ), 194, 194n, 198n
Analysis and design, process strategy and, 266–270
Andon, 403
Andrew Carter, Inc., 557–558
Anheuser-Busch, 508, 526–528
APEC, 31
Apple Computer Corp., 62
Appraisal costs, quality and, 196
Arcs, routing and scheduling vehicles, and, T5–3
Area under the normal curve, T1–4 to T1–5
Argentina, MERCOSUR and, 31
Ariba, 446
Arithmetic approach, learning curves, 784
Arnold Palmer Hospital, 62, 364, 420, 460, 488, 620
  capacity planning, 312
  culture of quality, 218
  flowcharts and, 207
  JIT, 664
  layout, 356, 383–384
  managing quality, 192–194
  mission statement, 34
  process analysis, 283–284
  project mgt., 100
  supply chain mgt., 460
Arrival characteristics, waiting-line models, 754, 755–756
Artifacts, 352–353
Artificial variables, T3–8
ASRS, 274–275
Assembly chart, 177
Assembly drawing, 177
Assembly line balancing, product-oriented layout and, 365–370
  objectives of, 365
Assembly line, product-oriented layout and, 365
Assignable variations, statistical process control and, 223
Assignment method, loading and, 609–611
Associative forecasting methods, 128–133
  correlation coefficient for regression lines, 131–133
  linear-regression analysis, 128
  multiple-regression analysis, 133
  regression analysis, 128–130
  standard error of the estimate, 130–131
Associative models, 109
Assumptions, break-even analysis and, 296–297
ASYBL, 370
AT & T, 195
Attribute inspection, 210
Attribute(s):
  control charts for, 230
  p-charts and, 230–232, 234
  versus variables, inspection and, 210
Auctions, supply chain management, and, 446
Audits & metrics to evaluate outsourcing performance, 475
Australia, SEATO and, 31
Automated Storage and Retrieval Systems (ASRS), 274–275
Automatic guided vehicles (AGV), 275
Automatic identification systems, (AIS), 273
Average observed time, 413
Average outgoing quality (AOQ), 239
Average outgoing quality (AOQ), T2–5 to T2–6
Avis car rental company, 734

Back flush, MRP and, 573
Backsourcing, 468
Backward integration, 439
Backward pass, 71–72
Backward scheduling, 604
Balanced flow approach, MRP and, 573
Balancing work cells, 361–364
Balking customers, 756
Banks, scheduling for services and, 621
Basic feasible solution, T3–3
Basic variables, T3–3
Bechtel, 56–58
Benchmarking, 201–202
Benetton, 583
Beta probability distribution, 74
BetzDearborn, Inc., 222
Bias, 134
Bias error, 134
Bills-of-material (BOM), 175, 565–567
Blanket orders, 443
BMW, 170, 171
Boeing Aircraft, 28–30, 366, 452
Borders Books, process strategy and, 261
Bottlenecks, 620
Bottleneck work centers, 620
Brazil, MERCOSUR and, 31
Breakdown maintenance, 674
Break-even analysis, 296–300
  algebraic approach, 297–298
  applying decision trees to capacity decisions, 300–301
  applying investment analysis to strategy-driven investments, 301–305
  assumptions and, 296–297
  contribution and, 296
  definition, 296
  fixed costs, 296
  graphic approach, 297
  multiproduct case and, 298–300
  objective of, 296
  outsourcing and, 472–473
  revenue function, 296
  single-product case and, 298
  variable costs, 296
Bristol-Myers Squibb, 170
Bucketless systems, MRP and, 573
Buckets, MRP and, 573
Buffer, 620
Build an organization, 46–47
Build-to-order, 261, 261n
Bullwhip effect, 442
Burger King, 364, 798

Cadillac, 195
Call Center industry, location strategies and, 330–331
CAM, 168–169
Canada, NAFTA and, 31
Capacity considerations, 290–291
Capacity management, service sector and, 293–294
Capacity options, aggregate strategies and, 531
Capacity planning, 287–313, 295–296, 579–580
  Arnold Palmer Hospital, 312
  break-even analysis, 296–300
  definition, 288
  MRP and, 579–580
    strategy and, 290
    strategy-driven investments and, 301–305
Capital, as productivity variable, 18
Cartoon industry in Manila, 31
Case Studies:
  Alabama Airlines simulation
    call center, 814–815
    SPC and, 249–250
  Andrew Carter, Inc., 557
  Bayfield Mud Company, SPC and, 248–249
  Custom Vans, Inc., 751–752

Note: Page numbers beginning with a T are on the CD-ROM Tutorial chapters.

Case Studies: (*continued*)
Dell, supply chain, 458–459
DeMar's Product Strategy, 189
Digital Cell Phone, Inc., forecasting and, 151–152
Golding Landscaping and Plants, Inc., 731
IKON Office Solutions, ERP and, 595–596
Jackson Manufacturing Co., work measurement, 429–430
JIT after the fire, 663–664
liver transplant, 703
Minit-Lube, Inc., operative strategy in a global environment and, 52–53
Motorola's Global Strategy, 54
Mutual Insurance Co. of Iowa, JIT, lean operation and, 662–663
New England Foundry, 779
North-South Airline, forecasting and, 153
Old Oregon Wood Store, short-term scheduling and, 635–636
Outsourcing to Tata, 479
Phlebotomists, routing and scheduling, T5–17 to T5–18
Rochester Manufacturing Corp., 283
Shale Oil Co., project management and, 102
Ski Right Corp., 703–704
SMT's negotiation with IBM, 793–794
Southard Truck Lines, human resources & job design, 407
Southwestern University:
aggregate planning, 556–557
forecasting, 151
project management, 99
quality, 217–218
State automobile license renewals, 382
Sturdivant Sound Systems, 522
Winter Park Hotel, 780
Worldwide Chemical Company, maintenance and reliability, 683–684
Zhou Bicycle Co., inventory mgt. and, 521
Zykol Chemicals Corp., productivity and operations, 24–25
Cash flow, strategy driven investments and, 302
Caterpillar, 48–49
Cause and effect diagrams, 205–206
achieving through operations, 36–39
c-charts, 232–233
differentiation, operations and, 36–37
response, operations, 37–39
Center of gravity method, location strategies and, 326
Certainty, decision-making under, 690
Cessna Aircraft, 646
Changing processes, process strategy, 266
Channel assembly, supply chain mgt. and, 444
Characteristics of vehicle routing and scheduling problems, T5–3 to T5–5
Chase strategy, aggregate scheduling and, 532
Check sheets, TQM tools and, 204
Chile, SEATO and, 31
Chinese postman problem (CPP), T5–4
Choice Hotels, 623
CIM, 275, 276
Clark and Wright Savings Heuristic, T5–5, T5–7 to T5–8
Classifying routing and scheduling vehicle problems, T5–3 to T5–4
Client firm, 464
Closed-loop material requirements planning, 579
Cluster first, route second approach, T5–10 to T5–11
Clustering, 322–323
CNC, 273
Coefficient approach, learning curves, 785–787
Coefficient of correlation, 131–133
Coefficient of determination, 133
Company reputation, quality and, 195
Comparative advantage, theory of, 467
Comparison of process choices, 263–266
Compatible organizational cultures, organizing the supply chain and, 441
Competing on cost, operations and, 37
Competitive advantage, operations and, 36–39
Amazon.com, 482–484
Anheuser-Busch and, 526–528
Arnold Palmer Hospital and, 192–194
Bechtel and, 56–58
Boeing and, 28–30
cost and, 37
definition, 38
Darden Restaurants, 432–434
Dell Computers, and, 254–256
differentiation and, 36–37
Disney World and, 104–106
Federal Express and
human resources and job design, 390
Federal Express and, 316–318
JIT, lean operations and, 640–642
McDonalds and, 346–347
product strategy options and, 158–159
Regal Marine and, 156–158
response and, 39–40
Southwest Airlines and, 45–46
Tupperware, 104–106
Wal-Mart and, 474
Wheeled Coach, 560–562
Competitive bidding, 448
Components:
lead time for, 565–567
reliability and, 671–673
Computer-aided design (CAD), 167–168
Computer-aided manufacturing (CAM), 168–169
Computer-integrated manufacturing (CIM), 275, 276
Computer numerical control (CNC), 273
Computer software for process oriented layouts, 360
COMSOAL, 370
Concurrent engineering, 166
Configuration management, 178
Considerations for capacity decision, 290–291
Consignment inventory, 645, 646
Constant-service-time waiting-line model, 766–767
Constant work-in-process (ConWIP), 607
Constraints:
graphical linear programming, 708–709
human resource strategy and, 390–391
linear programming, 706, 713
Consumer market survey, forecasting and, 109
Consumer's risk, 239, T2–3 to T2–4
Continuous improvement, quality and, 198–199
attributes, 230–232, 234
TPS and, 656
Continuous probability distributions, statistical tools and, T1–5 to T1–8
Continuous processes, 259–260
Contract manufacturing, 465
Contribution, break-even analysis and, 296
Control charts, 208, 222
c-charts, 232–233
defined, 222, 223
location strategies and, 321
managerial issues and, 233–235
p-charts, 230–232, 234
R-charts, 228–229
SPC and, 222
R-bar, 224
steps to follow in using, 229
variables, 223, 224
which chart to use, 234
x-bar, 224
Control files, scheduling and, 606
Controlling forecasts, 133–135
Controlling project mgt. and, 59, 62
Control of service inventory, 488–489
ConWIP cards, 607
Core competencies, 44–45
Core job characteristics, 394
CORELAP (Computerized Relationship Layout Planning), 360
Corner-point method, graphical linear programming, 711–712
Correlation coefficients for regression lines, 131–133
Cost-based price model, 448
Cost of quality (COQ), 196
Cost of shipping alternatives, 451
Cost(s) competitive advantage and, 37
location strategies and, 321
Cost-time trade-offs, project mgt. and, 79–81
Covisint, 445
C_p, 235
C_{pk}, 236–237
CPM. *See* Critical Path Method (CPM)
CRAFT (Computerized Relative Allocation of Facilities Techniques), 360
Crashing, project mgt. and, 79–81
Criteria, scheduling and, 605
Critical path, 63
Critical path analysis, 68–69
Critical Path Method (CPM), 61–82
Critical ratio (CR), sequencing and, 615–616
Critical success factors (CSF), 44–45
Critique of PERT and CPM, 81–82
Cross-docking, 354
Crossover charts, 264–265
Cultural issues, global view of operations and, 33–34
Culture, location strategy, and, 322
Cumulative probability distribution, 798
Cumulative values, learning curves, 786
Currency risks, location strategies and, 320
Curtis-Wright Corp., 782
Customer interaction, process design and, 270–271
Customizing, warehousing layout and, 354–355
Custom Vans, Inc., 751–752
Cycle counting, inventory management and, 487–488
Cycles, forecasting and, 110, 128
Cycle time, assembly line balancing and, 367
Cyclical scheduling, 623–625
Cyclical variations in data, forecasting and, 128

Darden Restaurants, 432–434, *also see* Video Cases, Olive Garden, Red Lobster
Deadhead time, T5–12
Decision-making tools, 685–704
decision process in operations, 686–687
decision tables, 688
decision trees, 691–695
environments, 688–691
under certainty, 690
expected value of perfect information (EVPI), 690–691
under risk, 689–690
under uncertainty, 688–689
fundamentals of decision making, 687
Decision trees:, 691–695
capacity decisions and, 300–301
in ethical decision making, 695
sequence of decisions, 693–694
Decision variables, linear programming, 708
Decline phase, product life cycle and, 160
Decomposition of a time series, 110
Degeneracy, transportation models, 742–743
Dell Computers, 254–256, 262, 458–459
Delphi method, forecasting and, 108–109
Delta Airlines, 62, 600–602
Demand
forecasts, 107
management in service sector, 293–294
options, aggregate strategies and, 532
transportation models, 741–742
Deming Prize, 195
Deming's 14 points, quality and, 197, 199
Dependent inventory models, requirements, 562–567
accurate inventory records and, 567
application of decision trees to product design, 182–183
bills-of-material and, 565–567
defining the product, 174–176
generating new products, 160–162
goods and services selection, 158–160
issues for product design, 167–172
lead times for components and, 567

master production schedule and, 562–564
product development, 162–166
purchase orders outstanding and, 567
service design, 178–181
time-based competition, 172–174
transition to production, 183
Depot node, routing and scheduling vehicles and, T5–3
Design capacity, 289
Design for Manufacture & Assembly (DFMA), 167
Design of goods and services, 155–190
design-to-order (DTO), 261n
Developing missions and strategies, 34–36
DHL, 450
Diet problem example, linear programming, 718–719
Differences between goods and services, 10–11, 41
Differentiation, competitive advantage and, 36–37
Disadvantages:
of ERP systems, 585
of outsourcing, 474–475
of simulation, 797
Disaggregation, aggregate planning and, 530
Discrete probability distributions, strategic tools and, T1–2 to T1–3
Disney:
experience differentiation and, 36
forecasting and, 104–106, 108
waiting-line systems, 754
Disney World, 104–106, 670
Distance reduction, JIT layout and, 647
Distribution resource planning (DRP), 581–582
Distribution systems. *See also* Transportation models
supply chain management, 449–450
DMAIC, TQM and, 199
Documents:
for production, 176–178
for services, 180
Double sampling, T2–2
Drop shipping, 444
Drum-buffer-rope, 620
Dual value, constraint, 714
Dummy activities, 64
Dummy destinations, transportation modeling, 741
Dummy sources, transportation modeling, 741
DuPont, 63, 169, 170
Dynamics, MRP and, 572

Earliest due date (EDD), 612
Earliest finish time (EF), Critical Path Analysis and, 69–71
Earliest start time (ES), Critical Path Analysis and, 69–71
Economic forecasts, 107
Economic order quantity (EOQ) model, 490–491, 574–576
lot sizing and, 574–576
minimize costs, 491–495
production order quantity model, 497–499
quantity discount model, 500–502
robust model, 495
capacity and, 289
Economic part period (EPP), lot sizing, and, 576–577
Economics, supply chain, and, 436–438
Effective capacity, 289
Efficiency, OM and, 14n
