Abstract

This study aims to know the procedure and basic knowledge in preparedness of seafarers during emergency. This is a qualitative research that was conducted utilizing an interview design. The researchers made questionnaires to transmit the questions through social media because of the distance of the respondents. The respondents are the seafarers who encountered emergency situations and how they handle this kind of emergency. The researcher gathered data and made unto conclusions and derives into different answers. This answer aimed to help the incoming seafarer in the future.
