ADLARD COLES NAUTICAL
London

CONTENTS

CHAPTER		PAGE
1	ELECTRON THEORY, THE ELECTRIC CIRCUIT, TERMS AND LAWS The nature of electricity, Structure of the atom, Ionisation, Circuit conditions, Ohm's law. Series and parallel circuits. Kirchhoff's laws. Internal resistance of supply source. Electromotive force and the terminal p.d. or voltage. The series-parallel circuit. Ammeters and voltmeters. Range extension of ammeters and voltmeters. Instrument sensitivity.....	1—24
2	THE ELECTRIC CIRCUIT (CONTINUED), UNITS The SI system. Mechanical units of force, work and energy, power. Electrical units of current, quantity, voltage and resistance. Examples relating mechanical and electrical energy. Efficiency. Grouping of cells. Maximum power conditions...	25—44
3	CONDUCTORS AND INSULATORS Resistance of a conductor—variation with dimensions and material. Variation of conductor resistance with temperature. Temperature coefficient of resistance. Resistance of an insulator—variation with dimensions and material. Variation of insulation resistance with temperature. Resistance of a semiconductor—variation with temperature. Heat and electrical energy.	

Relations between mechanical and heat energy. Relations between electrical and heat energy. Atomic theory of conduction. Energy levels. Energy bands. Crystal lattice. Conductivity. Metallic, liquid and gaseous conduction.....

45—75

CHAPTER 4—ELECTROCHEMISTRY

Electrolysis. Dissociation. Electrolytic cells. Voltmeters (water and copper). Quantitative laws of electrolysis (Faraday's). The electrochemical equivalent, chemical equivalent, valency and atomic weight. Back e.m.f. of electrolysis. Resistance of electrolytes. Power expended during electrolysis. Primary and secondary cells. The simple voltaic cell—cell e.m.f. Electrochemical series. Polarisation. The primary cell. Leclanché (wet and dry types). The secondary cell—capacity and efficiency. Charging procedure. pH value. Electrochemical Corrosion. Cathodic Protection—sacrificial anode and impressed current methods.

76—112

CHAPTER 5—MAGNETISM—ELECTROMAGNETISM

Natural and artificial magnets. The magnetic field—flux and flux-density. Molecular theory of magnetism. Electromagnetism. Fields due to long, straight, current-carrying conductor, loop and solenoid—introduction of an iron core. Force on a current-carrying conductor in a magnetic field, units of ampere, flux-density and flux. The magnetic circuit, magnetising force or magnetic field strength. Magnetising force of a current-

carrying conductor. Permeability (μ). Permeability of free space (μ_0). . . 113—136

CHAPTER 6— ELECTROMAGNETIC CIRCUITS
Permeability of free space (μ_0). Magnetising force due to a long, straight, current-carrying conductor, inside a solenoid and inside a toroid. Ferro-magnetism. Relative permeability (μ_r). The B-H or magnetisation curve. Reluctance (S). The composite magnetic circuit—series and parallel arrangements. Magnetic fringing and leakage. Iron losses—the hysteresis loop, hysteresis and eddy-current losses. Pull of an electromagnet..... 137—161

CHAPTER 7— ELECTROMAGNETIC INDUCTION
Flux-linkages. Faraday's and Lenz's laws of electromagnetic induction. Static induction—e.m.f. of self and mutual induction. Coupling factor. Inductances in series. Dynamic induction—magnitude of e.m.f. The Weber. Direction of induced e.m.f.—Fleming's right-hand rule. The simple magneto-dynamo. The simple d.c. generator, commutation, and practical requirements—windings. A.C. and d.c. theory—introduction..... 162—192

CHAPTER 8— ELECTROSTATICS AND CAPACITANCE
Electric field. The electroscopes. Potential difference. Electrostatic charging—induction. Distribution of charge. Electrostatic fields of force. Electrostatic flux. Electric potential. The capacitor. Capacitor systems—series and parallel connections, capacitor current. Energy stored in an electric field or dielectric. Relative and absolute

	permittivity (ϵ_r and ϵ). Permittivity of free space (ϵ_0). Capacitance of a parallel-plate capacitor. Transient effects in a d.c. circuit (capacitive)..	193—216
CHAPTER 9—	BASIC A.C. THEORY	
	The a.c. waveform. Representation of sinusoidal alternating quantities—trigonometrical and phasor representation. Addition and subtraction of alternating quantities—graphical and mathematical methods. <u>Root mean square and average values.</u> Form factor. Peak factor	217—237
CHAPTER 10—	THE A.C. CIRCUIT (CONTINUED) AND SYSTEMS	
	Impedance, inductance, inductive reactance. Circuits with pure resistance, pure inductance and resistance and inductance in series—power factor—true and apparent power. Capacitance, capacitive reactance. Circuits with pure capacitance, and resistance and capacitance in series. The series circuit—inductive impedances in series and inductive and capacitive impedances in series. The general series circuit—resonance	238—268
CHAPTER 11—	A.C. CIRCUITS (CONTINUED) AND SYSTEMS	
	Power in the a.c. circuit. Active and reactive components. The parallel circuit. Inductive impedances in parallel. Inductive and capacitive impedances in parallel. Parallel resonance. Power-factor improvement, advantages of power factor improvement, kW , kVA and $kVAr$. Power-factor improvement (kVA method). Polyphase	

working—three-phase systems. Star or Y connection—use of the neutral. Balanced and unbalanced loads. Delta or mesh connection. Three-phase power. Three-phase kVA , kW and $kVAr$ 269—298

CHAPTER 12— THE D.C. GENERATOR

D.C. machine construction—field system and armature, d.c. armature winding arrangements. The d.c. generator—e.m.f. equation. No-load characteristics. Associated magnetic circuit effects. Generator characteristics. Types of d.c. generator—permanent magnet and separately excited types. The shunt-connected generator—theory of self-excitation. The magnetisation curve or O.C.C. and critical resistance. Load characteristic. The series connected generator, self-excitation and load characteristic. The compound connected generator. Types of connection. Load characteristic..... 299—333

CHAPTER 13— THE D.C. MOTOR

Direction of force—Fleming's left-hand rule. Magnitude of force. Back e.m.f. of a motor. Voltage, current and speed equations. Speed controlling factors. Types of d.c. motor—shunt, series and compound. The power and torque equations. Torque controlling factors. Motor characteristics. The shunt motor—electrical characteristics (speed and torque), mechanical characteristic. The series motor, electrical characteristics (speed and torque), mechanical characteristic. The compound motor—electrical characteristics

	(speed and torque), mechanical characteristics. Cumulative and differential connection of fields—strength of shunt and series fields. Motor starters. Speed control—field and voltage control. Estimation of d.c. machine efficiency.....	334—360
CHAPTER 14—	ELECTRONICS AND THERMIONIC DEVICES Thermionic devices. Electron emission. The vacuum diode and triode, static characteristics—load line, diode as a rectifier. Ionisation. Discharge lamps. The fluorescent lamp (low-pressure). The fluorescent lamp (high-pressure). The cathode-ray oscilloscope. The cathode-ray tube (C.R.T.), operation, focusing deflection. Time-base.....	361—389
CHAPTER 15—	SOLID STATE ELECTRONICS AND DEVICES Semiconductors. Basic theory, covalent bonding. Conduction control, intrinsic conductivity, impurity (extrinsic) conductivity. N and P type material, ionisation. The P-N junction. The junction diode, forward bias, reverse bias, diode characteristic. Rectifier operation, static and dynamic operation. Rectifier circuits, capacitor smoothing, filter circuit. Voltage doubler circuit. Stabilised power supplies. The Zener Diode.....	390—412
CHAPTER 16—	MISCELLANEOUS CIRCUIT CONDITIONS AND METHODS OF SOLUTION, SPECIAL APPLICATIONS D.C. networks. Application of Kirchhoff's laws. Maxwell's circulating current theorem. The super-position of current theorem. Conductance, susceptance and	

admittance—the series and parallel circuit. The Wheatstone bridge. Measurement of resistance. Temperature measurement. The potentiometer. The thermocouple. Temperature measurement, compensating leads or cables, instrumentation.....	413—438
SOLUTIONS TO PRACTICE EXAMPLES	439—533
SECOND CLASS EXAMINATION QUESTIONS	534—541
SOLUTIONS TO SECOND CLASS QUESTIONS	542—559
FIRST CLASS EXAMINATION QUESTIONS	560—569
SOLUTIONS TO FIRST CLASS QUESTIONS	570—603
INDEX	605—608

INDEX

- Current 5, 8
 Current carrier 70
 Current equation, motor 336
 Cycle 219
- D**
 D.C. Generator 169, 182, 314
 D.C. machine 299
 D.C. motor 334
 D.C. machine efficiency 356
 Delta connection 287, 291
 Depolariser 95
 Derived units 27
 Dielectric 200
 Differential connection 327, 350
 Diode characteristics, vacuum .. 365
 Diode characteristics, semi-conductor 399
 Diode vacuum 363
 Diode junction 397
 Discharge lamp 72, 380
 Donor 395
 Drum winding 188
 Dry cell 97
 Dynamic characteristic, diode (vacuum) 365, 369
 Dynamic electricity 194
 Dynamic induction 173
- E**
 Eddicurrent coefficient 156
 Eddicurrent loss 152, 156, 356
 Effective value 229
 Efficiency 34, 103
 Efficiency, d.c. machine 356
 Electric charge 78, 193
 Electric circuit—see Circuit
 Electric flux 201
 Electric field 193, 200
 Electric flux intensity 202
 Electrical energy 34, 60
 Electrical units 29
 Electrochemical equivalent ... 83, 85
 Electrode 78, 81
 Electrolysis 78, 108
 Electrolyte 78
 Electrolytic cell 80
 Electrolytic dissociation 77, 88
 Electromagnet 124
 Electromagnetic induction 162
 Electromagnetic force 125, 126
 Electromagnetism 120
 Electromotive force 7, 12
 Electrochemical series 94
- Electron 1
 Electron, valence 4, 65
 Electron emission 72, 361
 Electron-volt 65
 Electrostatics 195
 Electrostatics 194, 197
 Element 1
 E.M.F. equation, d.c. generator 309
 E.M.F. equation, d.c. motor 336
 Energy 28, 37, 58
 Energy stored in electric field 207
 Energy in magnetic field 154
 Energy bands 65
 Energy levels 64
 Equivalent-ring winding 308
 Extrinsic conductivity 394
 Exponential curve 211
- F**
 Farad 253
 Faraday's laws of electrolysis 83
 Faraday's laws of induction 164
 Ferromagnetic materials 114
 Field coils 301
 Field electric 193, 200
 Field magnetic 115, 120, 122
 Field system 299
 Filament 363
 Filter circuit 407
 Fleming's hand rules 178
 Fluorescent lamp 380
 Flux, electric 193, 202
 Flux, magnetic 116, 117, 128
 Flux, density 117, 128
 Flux linkages 163, 241
 Focusing 385
 Force 28, 126, 334
 Force, electric 200
 Force, line of 116
 Force, magnetising 129
 Form factor 234
 Frequency 219
 Friction loss 152, 356
 Full wave rectifier 404
- G**
 Galvanic action 108
 Galvanometer 427, 431
 General series circuit 261
 Generator, a.c. 162, 180
 Generator, d.c. 182
 Germanium 390, 393
 Gramme-ring 187
 Grid 372, 385

Grouping of cells	37	Line of flux (magnetic)	116
H		Line of flux (electric)	200
Half wave rectification	403	Line of force—see above	
Heat energy	58, 60	Load characteristic	315, 322, 325, 327
Heating effect	29, 58	Load line	369, 370
Henry	241		
Hertz	219	M	
High tension	365, 394	Magnet	113
Holes	69	Magnetic circuit	129, 311
Horizontal component	226	Magnetic circuit series	145
Hysteresis coefficient	155	Magnetic circuit parallel	145
Hysteresis loop	153	Magnetic effect of current	120
Hysteresis loss	153, 155, 357	Magnetic field	115
I		Magnetic field strength (intensity)	129, 131, 137
Impedance	238	Magnetic flux density	117, 128
Impedances in series ..	258, 260, 420	Magnetic hysteresis	313
Impedances in parallel ..	272, 273, 421	Magnetic leakage	150
Impurity conductivity	394	Magnetic materials	114
Impressed current	109	Magnetic saturation	118, 141
Induced e.m.f.	166, 167, 175	Magnetisation curve	314, 318
Inductance	162, 239, 245	Magnetising force	129, 131, 137
Inductance in series	171	Magnetism	113
Induction	162, 164	Magnetodynamo	180
Inductive impedances (in series)	258	Magnetomotive force	130, 137
Inductive and capacitive		Majority carriers	395
(in series)	260	Mass	26, 27
Inductive reactance	239, 241	Maximum power, battery	42
Inductor	240	Maximum value	218
Instantaneous value	182, 218	Maxwell's rule	121
Instrumentation	435	Maxwell's circulating current	theorem 415, 419
Intrinsic conductivity	393	Mechanical energy	34
Ionisation	5, 379, 395	Mechanical losses	152
Iron loss	356	Mechanical units	27
J		Mesh connection	291
Joule	27, 28	Midordinate rule	230
Junction diode	397	Minority carriers	395
K		Modulator	385
Kirchhoff's Laws	9, 413, 418	Molecular theory	118
L		Molecule	64
Lag	221	Motor (d.c.)	334
Laws of Electrolysis	831	Motor back e.m.f.	336
Laws of electromagnetic induction	164	Motor characteristics	343
Lap winding	305, 306	Motor current equation	336
Lead	221	Motor speed equation	337
Lead-acid cell	99	Motor speed controlling factors	338
Leakage coefficient	150	Motor torque equation	342
Leclanche cell	96, 97	Motor voltage equation	335
Left-hand rule	335	Motor characteristic	374
Lenz's law	164	Mutual conductance	376
		Mutual induction	168, 169

- N**
 Neutral 289
 Neutron 2
 Newton 27, 28, 176
 N-type germanium 394
 Nucleus 2
- O**
 Ohm 7
 Ohm's law 8
 Open-circuit characteristic . 314, 318
 Orbital electrons 2
- P**
 Parallel circuit (d.c.) 9, 10
 Parallel circuit (a.c.) 271, 421
 Parallel connection 38, 271
 Parallel-plate capacitor 209
 Parallel resonance 274
 Peak factor 235
 Peak inverse voltage 398
 Peak value 219
 Percentage compounding 328
 Periodic time 219
 Permanent magnet ... 114, 125, 315
 Permeability, of free space 132, 138
 Permeability, relative 141
 Permeability, absolute 132, 138
 Permittivity, of free space 208
 Permittivity, relative 207
 Permittivity, absolute 208
 Phase difference 221, 288
 Phasor 218
 Phasor diagram 222
 P-N Junction 396
 Polarisation 79, 88, 95
 Poles 113
 Polyphase working 286
 Potential difference 7, 196
 Potentiometer 430
 Power 28, 90
 Power, single-phase 243
 Power, three-phase 292
 Power equation, motor 341
 Power factor 239
 Power-factor improvement 276, 284
 Primary cell 91, 96
 Primary coil 167
 Proton 2
 P-type germanium 395
 Pull (of an electromagnet) 156
 pH, Meaning of 106
- Q**
 Quantity 30
 Quantum shells 64, 391
- R**
 Range resistor 20
 Reactance 239, 240
 Reactive component 270
 Reactor 240
 Rectifier 400
 Rectifier circuits 402
 Regulation 279
 Reluctance 131, 137, 143
 Residual magnetism 311
 Resistance 7, 33, 45, 53, 90
 Resistance measurement 427
 Resistivity 47
 Resonance 263, 274
 Reverse bias 398
 Right-hand rule 123, 178
 Ripple voltage 405
 Root mean square 222, 229
- S**
 Sacrificial anode 109
 Saturation effect,
 magnetic 118, 141, 311
 Saturation effect, vacuum diode 364
 Secondary cell 91, 101
 Secondary coil 167
 Self-excitation 318, 324
 Self inductance 164
 Self induction 164
 Semiconductor 56, 390
 Sensitivity, instrument 22
 Separate excitation 315
 Series circuit (a.c.) 258, 420
 Series circuit (d.c.) 9, 10
 Series-connected generator 324
 Series-connected motor 340
 Series connection 37
 Series-parallel circuit (a.c.) 426
 Series-parallel circuit (d.c.) 8
 Series-parallel connection 40
 Series resonance 263
 Shaft 303
 Shell 3, 64, 77, 391
 Shunt 18
 Shunt-connected generator 317
 Shunt-connected motor 339
 Siemens 10, 423
 Silicon 390, 391, 393
 Sinewave (sinusoidal) 218, 221
 S.I. system 27

Slope resistance	366	Transient	210, 241
Smoothing circuit	404	Trigonometrical representation	221
Solenoid	122	Triode, vacuum	372
Solid-state devices	390	U	
Space charge	362	Unbalanced load	290
Specific heat capacity	58	Units	25, 27, 29
Specific resistance	47	V	
Speed control (field)	353	Vacuum diode	363
Speed control (voltage)	353	Vacuum triode	372
Speed controlling factor, motor	338	Valence electron	3, 65
Speed equation	337	Valency	84, 85, 392
Stabilising circuit	409	Vertical component	226
Star connection	287	Virtual value	229
Starters (motor)	351	Volt	31
Static characteristics, diode		Voltage	7, 9, 31
(vacuum)	365	Voltage doubler, circuit	407
Static characteristics, diode		Voltage equation, generator	309
(semiconductor)	399	Voltage equation, motor	336
Static characteristics,		Voltaic cell	81, 91
(triode)	374	Voltmeter	81, 82
Static electricity	194	Voltmeter	17
Strength of field	202	W	
Superposition of current theorem	416	Water voltmeter	81
Surface density	199	Watt	27, 28
Susceptance	420, 423	Wave winding	305, 307
Susceptibility	125	Waveform	218
Swinburne test	356	Weber	117, 163
T		Weston standard cell	431
Temperature coefficient	49	Wheatstone bridge	418, 427
Temperature measurement	429, 432	Windage loss	152, 356
Temperature p.d.	11	Work	28
Tesla	117	Y	
Thermionic devices	361	Yoke	300
Thermionic emission ...	72, 362, 379	Z	
Thermistor	57	Zener diode	408
Thermocouple	432	Zener effect	398
Time-base	386		
Time constant	211		
Torque equation	342		
Torque controlling factors	342
