TABLE OF CONTENTS

Introduction iii

Unit 1. SCIENCE, TECHNOLOGY AND SOCIETY FROM A CRITICAL HISTORICAL PERSPECTIVE 1

Chapter 1. Social Forces and How They Impinge on the Work Scientists as Social Entities 2

Chapter 2. Theories and Concepts of Science and Technology 7

Why Study Science and Technology Vis-a-vis Society? 8

Chapter 3. Nature of Science and Technology 13

Science Vis-a-vis Other Forms of Knowing 13

The Scientific Method 15

Chapter 4. Science as a Social Product 21

The Political Economy for the Production of Science and Technology 21

The "Production" of the Scientist 22

The "Production" of Scientific Knowledge and Technology 24

Chapter 5. The Scientific Work Ethic 29

The Case of the Social Sciences 31

Chapter 6. Historical Perspectives on the Interactions of Science, Technology and Society 37

Significant Events in the History of Science and Technology 37

Scientific and Technological Knowledge 37

Technological Inventions and Discoveries ... 50

Approaches to the Study of the History of Science 65

Theories on the Nature of the Development of Scientific Knowledge 66

Unit 2. THE SOCIAL DIMENSIONS OF SCIENCE AND TECHNOLOGY 73

Chapter 7. Science, Technology and the Development Process 74
The Development Process 74
Theories of Social and Technical Change 75

Chapter 8. Social, Political and Economic Development Vis-a-vis the Development of Science and Technology 81
Science, Technology and Modernization 81
Science, Technology and State-building 83
Science, Technology and Capitalism 85
Science, Technology and Globalization 86

Chapter 9. Science, Technology and the Power Relations in Society 93
Power Relations in Society 93
Science, Technology and Class Relations 97
Science, Technology and Gender Relations 99
Science, Technology and Cultural Relations 101

Chapter 10. Science, Ethics and Ecology 113
The Ethics of Science 113
Ethical Implications of Scientific Knowledge ... 114
Environmental Ethics and Scientific Knowledge 116

Unit 3. CRITICAL ANALYSIS OF THE INTERRELATIONSHIPS BETWEEN SCIENCE, TECHNOLOGY AND SOCIETY 123

Chapter 11. Framework for Critical Analysis of Science and Technology 124
Critical Social Theory 124
The Ideology of Science and Technology 128
Alternative Frameworks for Analyzing the Relationships Between Technology and Society 130

Chapter 12. Approaches to Technology Impact Assessment 135
Stakeholder Analysis 135
Technology Impact Profiling 137
Technology Access and Control Profile 137
Technology-Related Decision-Making Profile 138
Technology Benefit and Burden Profile 139
Technology Environmental Impact Assessment 140
Technology Social Impact Assessment 142
Benefit-Cost Analysis 142
Class Analysis 142
Gender Analysis 144
Cultural Analysis 144

Unit 4. SCIENCE, TECHNOLOGY AND GOVERNANCE 149

Chapter 13. Issues, Dynamics and Challenges of Science Governance 150
Science-governance Connections 152
Limitations and Prospects for Science-based Governance 153
Challenges for Global Science Governance 154
Role of Epistemic Communities 160
The Role of Science in Regional Governance: The Case of ASEAN Environments 161

Chapter 14. Science Policy and Institutions in the Philippines 175
National Science Policy 175
Institutional Framework for Science and Technology 176

Bibliography 189
