TABLE OF CONTENTS

| | |
|---------------|----|
| Preface | ix |
|---------------|----|

UNIT I INTRODUCTORY TO INFERRENTIAL STATISTICS

CHAPTER 1 Probability Concepts

| | |
|---|----|
| Lesson 1 Basic Concepts of Probability..... | 3 |
| Brief Introduction to Statistics | 3 |
| Probability Terminology | 3 |
| Subjective Probability | 5 |
| Classical Probability | 5 |
| Meaning of 'And' and 'Or' in Probability..... | 8 |
| Empirical Probability | 10 |
| Basic Probability Rules | 11 |
| Complementary Event | 12 |
| Summary..... | 13 |
| Statistical Terms for Study | 13 |
| Review and Practice | 14 |

| | |
|--|----|
| Lesson 2 Probability Rules on Addition, Multiplication, and Counting | 16 |
| Addition Rules..... | 16 |
| Multiplication Rules | 19 |
| Conditional Probability..... | 22 |
| Counting Technique..... | 23 |
| Permutation..... | 26 |
| Combination | 27 |
| Summary..... | 29 |
| Statistical Terms for Study | 30 |
| Review and Practice | 30 |

CHAPTER 2 Probability Distribution

| | |
|---|----|
| Lesson 1 Discrete Probability Distribution | 34 |
| Basic Understanding | 34 |
| Probability Distribution and Probability Function | 35 |
| Mean of Probability Distribution | 39 |

| | |
|---|-----------|
| Variance and Standard Deviation of Probability Distribution | 42 |
| Summary..... | 44 |
| Statistical Terms for Study | 44 |
| Review and Practice | 45 |
| Lesson 2 Normal Probability Distribution..... | 48 |
| Normal Distribution Concept | 48 |
| Skewed Distribution | 50 |
| Summary..... | 52 |
| Statistical Terms for Study | 52 |
| Review and Practice | 52 |
| Lesson 3 Applications of Normal Distribution | 54 |
| Standard Normal Distribution | 54 |
| Finding the Areas of Standard Normal Distribution | 55 |
| Area to the Left of the z value | 56 |
| Area to the Right of the z value | 57 |
| Area Between Two z values..... | 58 |
| Applications of Standard Normal Distribution..... | 60 |
| The Value of X Is the Unknown | 62 |
| Standard Normal Distribution as Probability Distribution..... | 63 |
| Summary..... | 65 |
| Statistical Terms for Study | 65 |
| Review and Practice | 66 |
| CHAPTER 3 Estimation and Confidence Interval | |
| Lesson 1 Sampling Distribution | 68 |
| Sampling Distribution of the Sample Means..... | 68 |
| Properties of Sampling Distribution of the Sample Means | 69 |
| Mean, Variance, and Standard Deviation of the Sample Means | 70 |
| Application of Sampling Distribution of Sample Means | 81 |
| Summary..... | 83 |
| Statistical Terms for Study | 83 |
| Review and Practice | 83 |
| Lesson 2 Estimation from Samples..... | 85 |
| Concept of Estimation | 85 |
| Confidence Interval Estimates for the Population Mean (σ Known)..... | 87 |
| Confidence Interval Estimates for the Population Mean (σ Unknown) | 88 |
| Confidence Interval Estimates for the Population Proportion | 90 |
| Confidence Interval Quality | 92 |

| | |
|--|----|
| Sample Size for Interval Estimate | 93 |
| Sample Size to Estimate Population Mean..... | 94 |
| Sample Size to Estimate Population Proportion..... | 96 |
| Summary..... | 98 |
| Statistical Terms for Study | 99 |
| Review and Practice | 99 |

UNIT II INFERENTIAL STATISTICS

CHAPTER 4 Hypothesis Testing

| | |
|--|------------|
| Lesson 1 Overview of Hypothesis Testing | 105 |
| Basic Understanding | 105 |
| Null Hypothesis | 106 |
| Alternative Hypothesis | 106 |
| Hypothesis Testing Direction | 107 |
| Summary..... | 109 |
| Statistical Terms for Study | 109 |
| Review and Practice | 110 |
| Lesson 2 Methods of Testing Hypothesis..... | 112 |
| Methods of Testing Hypothesis | 112 |
| Traditional Method | 113 |
| P-Value Method..... | 116 |
| Confidence Interval Method..... | 118 |
| Error in Testing Hypothesis | 119 |
| Summary..... | 125 |
| Statistical Terms for Study | 126 |
| Review and Practice | 126 |

CHAPTER 5 Test of Difference

| | |
|--|------------|
| Lesson 1 Test of the Mean Involving One Population..... | 130 |
| Basic Concept..... | 130 |
| Z-Test..... | 130 |
| t-Test | 135 |
| Z-Test for a Proportion | 140 |
| Summary..... | 144 |
| Statistical Terms for Study | 144 |
| Review and Practice | 145 |

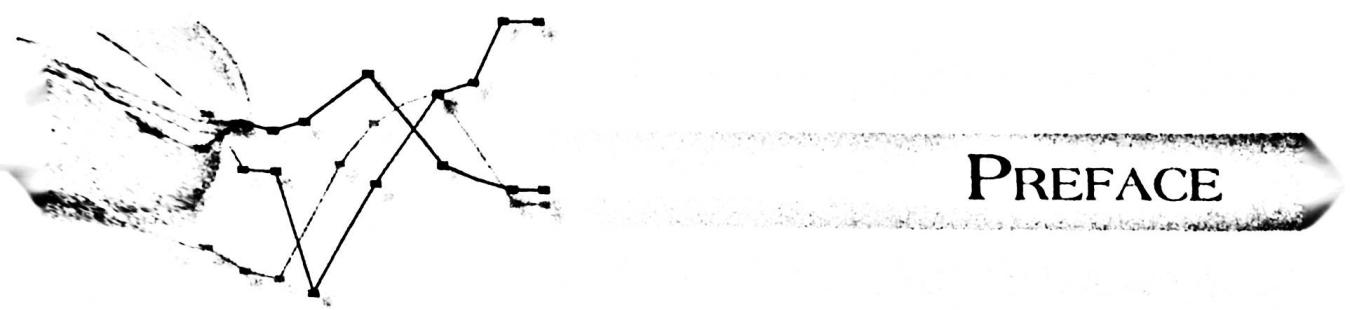

| | |
|--|------------|
| Lesson 2 Test of the Mean Involving Two Populations | 147 |
| Normal Distribution Concept | 147 |
| Z-Test Involving Two Means of Independent Samples | 147 |
| T-Test Involving Two Means of Independent Samples | 150 |
| t-Test Involving Two Means of Dependent Samples | 153 |
| Z-Test Involving Proportions of Two Independent Samples | 157 |
| Summary..... | 160 |
| Statistical Terms for Study | 161 |
| Review and Practice | 161 |

CHAPTER 6 Test of Correlation and Regression

| | |
|--|------------|
| Lesson 1 Simple Linear Correlation | 165 |
| Understanding Correlation | 165 |
| Correlation Analysis between Numerical Variables | 166 |
| Correlation Analysis between Ordinal Variables..... | 170 |
| Hypothesis Testing for Correlation Coefficient..... | 174 |
| Summary..... | 179 |
| Statistical Terms for Study | 180 |
| Review and Practice | 180 |
| Lesson 2 Simple Regression..... | 184 |
| Understanding Regression..... | 184 |
| The Regression Equation and the Line of Best Fit..... | 185 |
| Summary..... | 189 |
| Statistical Terms for Study | 190 |
| Review and Practice | 190 |

Appendices

| | |
|--|------------|
| Appendix A Standard Normal Distribution Table..... | 193 |
| Appendix B Critical Values of Standard Normal Distribution | 196 |
| Appendix C Values of Student t Distribution Table..... | 197 |
| Appendix D Critical Values of Correlation Coefficient Table | 199 |
| Glossary | 201 |
| Index | 206 |
| References | 209 |

PREFACE

This textbook, *Statistics and Probability: For Senior High School*, has been designed in accordance with the curriculum of the K to 12 program of the Department of Education, and may serve the Competency requirements of the different academic tracks in senior high school.

The text, which assumes that the area of descriptive statistics has been fully covered in lower grade levels, is divided into two major units. The structure of the discussion adopts the procedural approach.

Unit I, with three chapters, basically provides enough introductory concepts to inferential statistics. Part of the discussion refreshes the learners on probability concepts and counting rules before introducing the principles of probability and estimation.

Unit II, which has three chapters as well, focuses largely on hypothesis testing involving the test statistics for the difference and relationship. The different approaches in testing the hypothesis are clearly illustrated as basis in drawing statistical conclusion.

Since the field of statistics is negatively perceived because of voluminous statistical computations, the entire text greatly considers the level of understanding of the learners. This book is a friendly learning material in statistics.

INDEX

A

- a priori probability, see *classical probability*
- Addition rules, 16
- And, meaning in probability, 8

B

- Bayesian probability, see *subjective probability*

C

- Central limit theorem, 68
- Classical probability, 5
- Complementary events, 12
- Compound event, 4
- Conditional probability, 22
- Confidence interval
 - estimate for the population mean, 87
 - estimate for the population proportion, 90
 - meaning, 86
 - quality, 92

Confidence interval method of testing hypothesis, 118

Constant function, 35

Correlation analysis - between numerical variables, 166 - between ordinal variables, 170

Counting technique, 23

D

- Degrees of freedom, 89
- Descriptive statistics, 3

E

- Empirical probability, 10
- Equally likely, 5
- Error in testing hypothesis
 - type I error, 119
 - type II error, 119
- Estimate, 85

Event

- dependent, 19
- independent, 19
- meaning, 4
- repetition allowed, 25
- repetition not allowed, 25

Exclusive

- mutually exclusive, 16
- not mutually exclusive, 16

Expected probability, see *classical probability*

Experiment, 4

H

- Hypothesis
 - alternative hypothesis, 106
 - directional hypothesis, 107
 - meaning, 105
 - methods of testing, 112
 - null hypothesis, 106
 - testing, 105
- Hypothesis testing for correlation coefficient, 174

I

Inferential statistics, 3

Interval estimate, 85

L

Law of large numbers, 10

Left-tailed test, 107

Line of best fit, 185

M

Multiplication rules, 19

N

Normal distribution, 48

Non-directional test, 107

O

One-tailed test, 107

Or

exclusive or, 8

inclusive or, 8

meaning in probability, 8

Outcome, 4

P

P-value method of testing hypothesis, 116

Permutation, 26

Personalistic probability, see *subjective probability*

Point estimate, 86

Probability,

basic probability rules, 11

meaning, 3

Probability distribution

function, 35

mean of, 39

meaning, 35

standard deviation, 42

variance, 42

R

Random variable

continuous random variable, 34

discrete random variable, 34

meaning, 34

Regression analysis, 184

Regression equation, 185

Relative frequency probability, see *empirical probability*

Right-tailed test, 107

S

Sample size

for interval estimate, 93

to estimate population mean, 94

to estimate population proportion, 96

Sample space, 4

Sampling distribution of the sample mean

comparison with population, 73

mean, 70

meaning, 68

properties, 69

standard deviation, 70

variance, 70

Sampling error, 68

Scatter diagram, 167

Simple event, 4

Skewed distribution

meaning, 50

negatively skewed, 51

positively skewed, 51

Spearman rank correlation coefficient, 170

Standard error of the mean, 70

Standard normal distribution

application, 60

as probability distribution, 63

finding the areas, 55

meaning, 54

Standard score, 54

Student distribution, see *t-distribution*

Subjective probability, 5

T

t-distribution, 89

t-test, 135

 involving two means of dependent samples, 153

 involving two means of independent samples, 150

Theoretical probability, see *classical probability*

Traditional method of testing hypothesis, 113

Two-tailed test, 107

V

Variable, 34

continuous, 48

continuous random, 48

dependent, 166

independent, 165

Variability, 86

Z

Z-score,

 formula, 54

 meaning, 54

Z-test, 130

 for proportion, 140

 involving proportions of two independent samples, 157

 involving two means of independent samples, 147
