Abstract

An unintended and in most cases unwanted pregnancy brings teenagers before a crisis. Teenage birth rate has declined from 9% in 1985 to 5,2% in 2002, but it still remains a serious medical and social problem. The high rate of teenage childbearing among minority and disadvantaged groups. Teenage pregnancies have become a public health issue because of their observed negative effects on perinatal outcomes and long-term morbidity. The association of young maternal age and long-term morbidity is usually confounded, however, by the high prevalence of poverty, low level of education, and single marital status among teenage mothers.

The purpose of the study is to know the reasons why many women are pregnant at an early age, the behavior of the teenagers and the way of thinking of teenagers nowadays. We chose ten (10) rightful respondents which are teenagers got pregnant at early the age. The first phase of the research involves an interview of respondents. The final phase involves questionnaire of which they answered based on their experiences.

As we go on our study, we came up with a result that shows the different perception of teenagers who got pregnant at early the age. This research will provide valuable information regarding teenage pregnancy. This information will likely impact the lives of future generations.

Acknowledgements

This thesis would not have been possible without the support and help from many people. We would like to thank God for giving us good health and strength to reach this far. We would also like to thank Mrs. Elvira Delgado for the mentoring and guidance that she provided to us while we were completing this project. We would like to acknowledge financial support that we received from our parents and also to our Computer Laboratory Coordinator for letting us to produce our thesis. It would not have been possible to accomplish this without the on-going love and support from our friends and family. We would like to thank also to those participants for their willingness and time they spend with us.
