

FOURTH EDITION

SCHAUM'S
outlines

Thermodynamics for Engineers

MERLE C. POTTER, PhD • CRAIG W. SOMERTON, PhD

889 fully-solved problems with
step-by-step solutions

20 problem-solving videos online

Concise explanations of all
course concepts

Explanations with abundant
illustrative examples

Use With These Courses:

Thermodynamics for Engineers

Fourth Edition

Merle C. Potter, PhD

*Professor Emeritus of Mechanical Engineering
Michigan State University*

Craig W. Somerton, PhD

*Associate Professor of Mechanical Engineering
Michigan State University*

Schaum's Outline Series

New York Chicago San Francisco Athens London Madrid
Mexico City Milan New Delhi Singapore Sydney Toronto

MERLE C. POTTER has BS and MS degrees from Michigan Technological University and MS and PhD degrees from The University of Michigan. He has coauthored textbooks on *Fluid Mechanics*, *Thermodynamics*, *Thermal Sciences*, *Differential Equations*, *Engineering Analysis*, *Advanced Engineering Mathematics*, and Schaum's Outlines on *Fluid Mechanics*, *Thermodynamics*, *Statics*, and *Dynamics* in addition to numerous engineering exam review books. His research involved fluid flow stability and energy-related topics. In addition to receiving several teaching awards, he is a member of Michigan Tech's Mechanical Engineering Academy and ASME awarded him the 2008 James Harry Potter Gold Medal. He is Professor Emeritus of Mechanical Engineering at Michigan State University and continues to write and golf.

Contents

Chapter 1	Concepts, Definitions, and Basic Principles	1
1.1	Introduction	1
1.2	Thermodynamic Systems and Control Volumes	2
1.3	Macroscopic Description	3
1.4	Properties and State of a System	3
1.5	Thermodynamic Equilibrium and Processes	4
1.6	Units	6
1.7	Density, Specific Volume, and Specific Weight	7
1.8	Pressure	8
1.9	Temperature	10
1.10	Energy	11
	Solved Problems	13
	Supplementary Problems	17
	Review Questions for the FE Examination	19
	Answers to Supplementary Problems	21
	Answers to Review Questions for the FE Examination	22
Chapter 2	Properties of Pure Substances	23
2.1	Introduction	23
2.2	The P - v - T Surface	23
2.3	The Liquid-Vapor Region	26
2.4	Property Calculations	26
2.5	The Ideal-Gas Equation of State	29
2.6	Equations of State for a Nonideal Gas	31
	Solved Problems	32
	Supplementary Problems	36
	Review Questions for the FE Examination	37
	Answers to Supplementary Problems	40
	Answers to Review Questions for the FE Examination	41
Chapter 3	Work and Heat	43
3.1	Introduction	43
3.2	Definition of Work	44
3.3	Quasi-Equilibrium Work due to a Moving Boundary	45
3.4	Nonequilibrium Work	48
3.5	Other Work Modes	49
3.6	Heat	51
	Solved Problems	53
	Supplementary Problems	57
	Review Questions for the FE Examination	60
	Answers to Supplementary Problems	62
	Answers to Review Questions for the FE Examination	63

Chapter 4	The First Law of Thermodynamics	65
4.1	Introduction	65
4.2	The First Law of Thermodynamics Applied to a Cycle	66
4.3	The First Law Applied to a Process	67
4.4	Enthalpy	69
4.5	Latent Heat	70
4.6	Specific Heats	71
4.7	The First Law Applied to Various Processes	75
4.8	General Formulation for Control Volumes	79
4.9	Applications of the Energy Equation to Control Volumes	83
4.10	Transient Flow	91
	Solved Problems	93
	Supplementary Problems	104
	Review Questions for the FE Examination	115
	Answers to Supplementary Problems	121
	Answers to Review Questions for the FE Examination	124
Chapter 5	The Second Law of Thermodynamics	125
5.1	Introduction	125
5.2	Heat Engines, Heat Pumps, and Refrigerators	126
5.3	Statements of the Second Law of Thermodynamics	127
5.4	Reversibility	128
5.5	The Carnot Engine	129
5.6	Carnot Efficiency	131
	Solved Problems	134
	Supplementary Problems	137
	Review Questions for the FE Examination	139
	Answers to Supplementary Problems	140
	Answers to Review Questions for the FE Examination	141
Chapter 6	Entropy	143
6.1	Introduction	143
6.2	Definition	143
6.3	Entropy for an Ideal Gas with Constant Specific Heats	145
6.4	Entropy for an Ideal Gas with Variable Specific Heats	146
6.5	Entropy for Substances such as Steam, Solids, and Liquids	148
6.6	The Inequality of Clausius	150
6.7	Entropy Change for an Irreversible Process	151
6.8	The Second Law Applied to a Control Volume	153
	Solved Problems	156
	Supplementary Problems	162
	Review Questions for the FE Examination	167
	Answers to Supplementary Problems	169
	Answers to Review Questions for the FE Examination	171
Chapter 7	Reversible Work, Irreversibility, and Availability	173
7.1	Basic Concepts	173
7.2	Reversible Work and Irreversibility	174
7.3	Availability and Exergy	176
7.4	Second-Law Analysis of a Cycle	178

	Solved Problems	180
	Supplementary Problems	184
	Answers to Supplementary Problems	185
Chapter 8	Gas Power Cycles	187
	8.1 Introduction	187
	8.2 Gas Compressors	188
	8.3 The Air-Standard Cycle	193
	8.4 The Carnot Cycle	195
	8.5 The Otto Cycle	195
	8.6 The Diesel Cycle	197
	8.7 The Dual Cycle	199
	8.8 The Stirling and Ericsson Cycles	200
	8.9 The Brayton Cycle	202
	8.10 The Regenerative Brayton Cycle	204
	8.11 The Intercooling, Reheating, Regenerative Brayton Cycle	206
	8.12 The Turbojet Engine	207
	Solved Problems	208
	Supplementary Problems	217
	Review Questions for the FE Examination	222
	Answers to Supplementary Problems	224
	Answers to Review Questions for the FE Examination	226
Chapter 9	Vapor Power Cycles	227
	9.1 Introduction	227
	9.2 The Rankine Cycle	227
	9.3 Rankine Cycle Efficiency	230
	9.4 The Reheat Cycle	232
	9.5 The Regenerative Cycle	233
	9.6 The Supercritical Rankine Cycle	237
	9.7 Effect of Losses on Power Cycle Efficiency	239
	9.8 The Combined Brayton-Rankine Cycle	241
	Solved Problems	242
	Supplementary Problems	249
	Review Questions for the FE Examination	253
	Answers to Supplementary Problems	255
	Answers to Review Questions for the FE Examination	256
Chapter 10	Refrigeration Cycles	257
	10.1 Introduction	257
	10.2 The Vapor Refrigeration Cycle	257
	10.3 The Multistage Vapor Refrigeration Cycle	261
	10.4 The Heat Pump	263
	10.5 The Absorption Refrigeration Cycle	264
	10.6 The Gas Refrigeration Cycle	266
	Solved Problems	268
	Supplementary Problems	271
	Review Questions for the FE Examination	274
	Answers to Supplementary Problems	275
	Answers to Review Questions for the FE Examination	276

Chapter 11	Thermodynamic Relations	277
	11.1 Three Differential Relations	277
	11.2 The Maxwell Relations	279
	11.3 The Clapeyron Equation	280
	11.4 Further Consequences of the Maxwell Relations	282
	11.5 Relationships Involving Specific Heats	284
	11.6 The Joule-Thomson Coefficient	286
	11.7 Enthalpy, Internal Energy, and Entropy Changes of Real Gases	286
	Solved Problems	289
	Supplementary Problems	294
	Answers to Supplementary Problems	296
Chapter 12	Mixtures and Psychrometrics	299
	12.1 Basic Definitions	299
	12.2 Ideal-Gas Law for Mixtures	300
	12.3 A Mixture of Ideal Gases	301
	12.4 Air-Vapor Mixtures: Psychrometry	303
	12.5 Adiabatic Saturation and Wet-Bulb Temperatures	305
	12.6 The Psychrometric Chart	307
	12.7 Air-Conditioning Processes	308
	Solved Problems	311
	Supplementary Problems	316
	Review Questions for the FE Examination	320
	Answers to Supplementary Problems	322
	Answers to Review Questions for the FE Examination	324
Chapter 13	Combustion	325
	13.1 Combustion Equations	325
	13.2 Enthalpy of Formation, Enthalpy of Combustion, and the First Law	328
	13.3 Adiabatic Flame Temperature	331
	Solved Problems	333
	Supplementary Problems	338
	Answers to Supplementary Problems	340
	Sample Exams for a Semester Course for Engineering Students	343
	Exam No. 1	344
	Exam No. 2	348
	Exam No. 3	352
	Final Exam	356
Appendix A	Conversions of Units	365
Appendix B	Material Properties	366
Appendix C	Properties of Water (Steam Tables)	372

Appendix D	Properties of R134a	387
Appendix E	Ideal-Gas Tables	397
Appendix F	Psychrometric Charts	409
Appendix G	Compressibility Chart	411
Appendix H	Enthalpy Departure Charts	413
Appendix I	Entropy Departure Charts	415
Index		417

*The laptop icon next to an exercise indicates that the exercise is also available as a video with step-by-step instructions. These videos are available on the Schaums.com website by following the instructions on the inside front cover.

Index

- Absolute pressure, 9
- Absolute temperature, 11
- Absorption refrigeration, 264
- Acceleration of gravity, 7
- Added mass, 14
- Additive pressures, Dalton's law of, 300
- Additive volumes, Amagat's law of, 300
- Adiabatic efficiency:
 - of compressors, 154
 - of turbines, 154
- Adiabatic flame temperature, 331
- Adiabatic process, 51, 77, 129
 - reversible, 145
- Adiabatic saturation process, 305
- Adiabatic saturation temperature, 305
- Adjusted heat, 177
- Advection, 52
- Air:
 - atmospheric, 303
 - excess, 326
 - properties of, 395, 401
- Air-conditioning processes, 308
 - adding heat, 308
 - adding moisture, 308
 - mixing air streams, 308
 - removing moisture, 308
- Air-fuel ratio, 326
- Air-standard cycles, 193
- Air-water vapor mixtures, 303
- Amagat's model, 300
- Atmosphere, table of, 363
- Atmospheric air, 303
- Atmospheric pressure, 9
- Availability, 174
 - steady-flow, 176
- Axial-flow compressor, 191
- Back work ratio, 203
- Barometer, 16, 19
- Base units, 6
- Blackbody, 52
- Blower, 84
- Boiler, 227
- Boiling, 24
- Bomb calorimeter, 329
- Bore, 193
- Bottom dead center, 193
- Boundary work, 45
- Brayton cycle, 202
 - with regeneration, 204
 - with reheating and regeneration, 206
- Brayton-Rankine cycle, 241
- Btu (British thermal unit), 6
- Bulk modulus, 285
- Carbon dioxide, properties of, 400
- Carbon monoxide, properties of, 401
- Carnot cycle, 130, 195
 - efficiency, 130, 195
 - P - v diagram, 130
 - reversed, 132
 - T - s diagram, 144
- Carnot engine, 129
 - efficiency, 130, 132
- Carnot heat pump, 132
- Carnot refrigerator, 132
- Celsius temperature scale, 11
- Centrifugal compressor, 191
- Chemical compound, 325
- Chemical energy, 328
- Chemical reactions, 325
- Clapeyron equation, 280
- Clausius-Clapeyron equation, 281
- Clausius inequality, 151
- Clausius statement of the second law, 127
- Clearance volume, 189, 193
- Closed feedwater heater, 234
- Coefficient:
 - of heat pumps, 89, 258
 - Joule-Thomson, 286
 - of performance, 89, 258
 - of refrigerators, 89, 258
 - of reversible heat pumps, 132
 - of reversible refrigerators, 132
- Cogeneration, 236
- Combined gas-vapor cycle, 241
- Combustion, 12, 325
 - complete, 325
 - enthalpy of, 328
 - incomplete, 325
 - theoretical, 325
- Comfort zone, 308
- Complete combustion, 325
- Compressed liquid, 25, 27, 379
- Compressed-liquid region, 25
- Compressibility chart, 411-412
- Compressibility factor, 29, 30
- Compression:
 - isentropic, 189
 - multistage, 190
- Compression-ignition engines, 197
- Compression ratio, 193
 - effect on thermal efficiency, 196
- Compressor:
 - air, 90
 - axial-flow, 191
 - centrifugal, 191
 - efficiency, 154, 189
 - first-law analysis, 85
 - gas, 188
 - intercooling, 191
 - reciprocating, 188
- Condensation, 304
- Condenser, 88, 227
- Conduction, 52
- Conservation:
 - control volumes, 80, 82
 - cycles, 66
 - of energy, 12, 65, 68
 - of mass, 80
 - steady-flow, 80
 - systems, 67
 - unsteady-flow, 91
- Constant pressure process, 76
- Constant pressure specific heat, 72, 73
 - of gas mixtures, 301
- Constant temperature process, 75
- Constant volume process, 76
- Constant volume specific heat, 71
 - of gas mixtures, 301

- Continuity equation, 81
 Continuum, 3
 Control surface, 2
 Control volume, 2, 80
 second law, 153
 Convection, 52
 Convection heat transfer coefficient, 52
 Conversion of units, 365
 Cooling:
 with dehumidification, 307
 evaporative, 309
 Cooling tower, 310
 COP (*see* Coefficient, of performance)
 Counterflow heat exchanger, 204
 Critical point, 24, 30
 table of properties, 368
 Critical properties of gas, 367
 Cutoff ratio, 197
 Cycle, 5, 88
 efficiency, 88
 irreversible, 150
 mechanical, 187
 open, 187
 power, 187
 refrigeration, 257, 266
 Cyclic formula for derivatives, 278

 Dalton model, 300
 Dead state, 174
 Dehumidification, 308
 Density, 3
 table of properties, 366–369
 Dependent property, 3
 Dew-point temperature, 304, 326
 Diesel cycle, 197
 Differential, 277
 exact, 46
 inexact, 46
 Differential form of first law, 279
 Diffuser, 87
 subsonic, 87
 supersonic, 87
 Discharge of a tank, 91
 Displacement volume, 193
 Dry air, 303, 306
 Dry-bulb temperature, 304
 Dual cycle, 199

 Effectiveness, 177
 Efficiency, 154
 adiabatic, 174
 Carnot, 130
 compressor, 154
 cycle, 88
 second-law, 174
 thermal, 88
 turbine, 154
 volumetric, 189

 Electric potential, 50
 Electrical work, 50
 Emissivity, 52
 Endothermic reaction, 328
 Energy, 11
 conservation of, 65
 equation, 82
 internal, 12
 kinetic, 11
 latent, 70
 potential, 12
 Energy efficiency ratio (EER), 132
 Energy equation, 82
 Engine:
 Carnot, 129
 compression-ignition, 197
 diesel, 193
 external combustion, 201
 heat, 126
 internal combustion, 187
 reversible, 128
 spark-ignition, 193, 195
 thrust of, 207
 turbojet, 207
 English units, 6
 Enthalpy, 70, 282
 of combustion, 328, 371
 of formation, 328, 370
 of gas mixture, 301
 of reactants, 328
 of vaporization, 68, 370, 371
 Enthalpy change:
 of gas mixture, 300
 general expression, 282
 of ideal gas, 71
 of incompressible substance, 70
 of reacting mixture, 328
 of real gas, 286
 Enthalpy departure, 287, 413–414
 Enthalpy-entropy diagram, 149
 Entrance, 83
 Entropy, 78, 144
 increase in, principle of, 154
 production, 144, 154
 Entropy change:
 of gas mixture, 303
 general expression, 283
 of ideal gas, 145
 of irreversible process, 151
 of liquid, 148
 of real gas, 288
 of solid, 148
 of universe, 152
 Entropy departure, 288, 415–416
 Entropy production, 154
 Equality of temperature, 11
 Equations of state:
 ideal gas, 29
 Redlich-Kwong, 31, 371

 Equations of state (*Contd.*):
 van der Waals, 31, 371
 virial, 31
 Equilibrium:
 metastable, 4
 of a system, 5
 thermodynamic, 3
 Ericsson cycle, 200
 Evacuated tank, 91
 Evaporative cooling, 309
 Evaporator, 89, 258
 Exact differential, 4, 46
 Excess air, 326
 Exergy, 177
 Exothermic reaction, 328
 Expansion valve, 89
 Extensive property, 4
 External combustion, 201

 Fahrenheit temperature scale, 11
 Feedwater heater, 234
 closed, 235
 open, 233
 Filling a tank, 91
 First law of thermodynamics, 65
 control volumes, 79
 differential form, 279
 liquid flow, 80
 steady now, 80
 systems, 66
 unsteady flow, 91
 Flow rate, 81
 Flow work, 82
 Fluid property calculator, 28
 Force, 8
 of attraction, 14
 Fourier's law of heat transfer, 52
 Friction, 128
 Fuel-air ratio, 326
 Fusion, heat of, 70

 Gage pressure, 9
 Gas compressor, 188
 Gas constant, 29
 of gas mixture, 300
 table of, 364
 universal, 29
 Gas mixtures, 300
 properties of, 301
 Gas power cycles, 187
 Gas refrigeration cycle, 266
 Gas turbine cycle (*see* Brayton cycle)
 Gas-vapor mixtures, 303
 Generalized compressibility chart, 412
 Generalized enthalpy departure chart, 413
 Generalized entropy departure chart, 415
 Gibbs function, 279

- Globe valve, 83
